VISION STATEMENT

*A dynamic hub for socio-economic development
by 2050.*

MISSION STATEMENT

To ensure effective utilization of economic resources to address socio-economic imperatives through mining, agriculture and tourism.

SECTION 1: EXECUTIVE SUMMARY

Integrated development planning is a process through which municipalities prepare a strategic development plan which extends over a five-year period. The Integrated Development Plan (IDP) is a product of the IDP process. The IDP is the principal strategic planning instrument which guides and informs all planning, budgeting, management and decision-making processes in a municipality.

Through Integrated development planning, which necessitates the involvement of all relevant stakeholders, a municipality can:

- Identify its key development priorities;
- Formulate a clear vision, mission and values;
- Formulate appropriate strategies;
- Develop the appropriate organizational structure and systems to realise the vision and mission; and align resources with the development priorities

In terms of the Municipal Systems Act (Act 32 of 2000) all municipalities have to undertake an IDP process to produce IDP's. As the IDP is a legislative requirement it has a legal status and it supersedes all other plans that guide development at local government level.

LEGISLATION BACKGROUND AND POLICY IMPERATIVES

Makhado Municipality is a Category B Municipality established in terms of the provisions of the Local Government Municipal Structures Act (Act 117 of 1998) which provides for the establishment of municipalities in accordance with the requirements relating to the categories and types of municipalities, the division of functions and powers between municipalities and the appropriate electoral systems.

The Municipality is furthermore an Executive Council Municipality as contemplated in section 3(b) of the Northern Province Determination of the Types of Municipality Act, 2000.

In terms of the Constitution, local government is in charge of its own development and planning processes. This Constitutional mandate to relate management, budgeting and planning functions to objectives, clearly indicates the intended purpose of the municipal IDP:

- To ensure sustainable provision of services;
- To promote social and economic development;
- To promote a safe and healthy environment;
- To give priority to the basic needs of communities; and
- To encourage community involvement.

It is crucial that the relevant legislation and policies regulating integrated development planning be thoroughly analysed to ensure that the process and its outputs address the principles outlined in the legal framework.

Constitution of the Republic of South Africa (Act 108 of 1996)

Section 152 of the Constitution says that local government should provide democratic and accountable government for local communities. It should ensure the provision of services to communities in a sustainable manner, promote a safe and healthy environment as well as encourage the involvement of communities and community organizations in matters of local government.

Section 153 of the Constitution states that “each municipality should structure and manage its administration, budgeting, and planning processes to give priority to the basic needs of the community and to promote the social and economic development of those communities.” Municipalities should participate in national and provincial programmes and infrastructure development programmes. Section 153 of the Constitution also encourages municipalities to involve communities in their affairs.

Municipal Systems Act (Act 32 of 2000)

The Municipal Systems Act regulates Integrated Development Planning. It requires municipalities to undertake developmentally oriented planning so as to ensure that it strives to achieve the objectives of local government as set out in Section 152 and 153 of the Constitution. Section 34 of the Municipal System Act 32 of 2000, requires the Municipal Council to review its integrated development plan annually in accordance with an assessment of its performance measurements in terms of section 41; and the extent that changing circumstances so demand; and may amend its integrated development plan in accordance with a prescribed process.

Section 26 of the Act further outlines the core components of the integrated development plan of a municipality. It requires the Integrated Development Plan of a municipality to reflect:

- The municipal council’s vision for the long term development of the municipality with special emphasis on the municipality’s most critical development and internal transformation needs;
- An assessment of the existing level of development in the municipality, which must include an identification of communities which do not have access to basic municipal services;
- The council’s development priorities and objectives for its elected term;
- The council’s development strategies which must be aligned with any national or provincial sector plans and planning requirements binding on the municipality in terms of the legislations;
- A spatial development framework which must include the provision of basic guidelines for a land use management system of the municipality;
- The council’s operational strategies;
- Applicable disaster management plan;
- A financial plan, which must include budgeted projects for at least the next three years, and;
- The key performance indicators and performance targets determined in terms of section 41 of the Act.

Municipal Finance Management Act (Act 56 of 2003)

The Municipal Finance Management Act was promulgated to secure sound and sustainable management of the financial affairs of municipalities and other institutions in the local sphere of government. The Act provides a mandatory provision that relate to financial and performance management. Section 2 of the Act stipulates that the objective is to secure sound and sustainable management of the financial affairs of local government institutions to which this Act applies by establishing norms and standards for:

- Ensuring transparency, accountability and appropriate lines of responsibility in the fiscal and financial affairs of municipalities and municipal entities;
- The management of revenues, expenditures, assets and liabilities and the handling of financial dealings, budgetary and financial planning processes;
- The coordination of those processes with those of the other spheres of government,
- Borrowing;
- Supply chain management; and
- Other financial matters.

White Paper on Local Government (1998)

The White Paper on Local Government (1998) views that Integrated Development Planning as a way of achieving developmental local government. It provides that the Integrated Development Planning intends to:

- Align scarce resources around agreed policy objectives;
- Ensure integration between sectors with local government;
- Enable alignment between provincial and local government and
- Ensure transparent interaction between municipalities and residents, making local government accountable.

The paper establishes a basis for developmental local government, where, “local government is committed to working with citizens and groups within the community to find sustainable ways to meet their social, economic and material needs and improve the quality of their lives”. It also encourages public consultation on policy formulation and in the monitoring and evaluation of decisions and implementation.

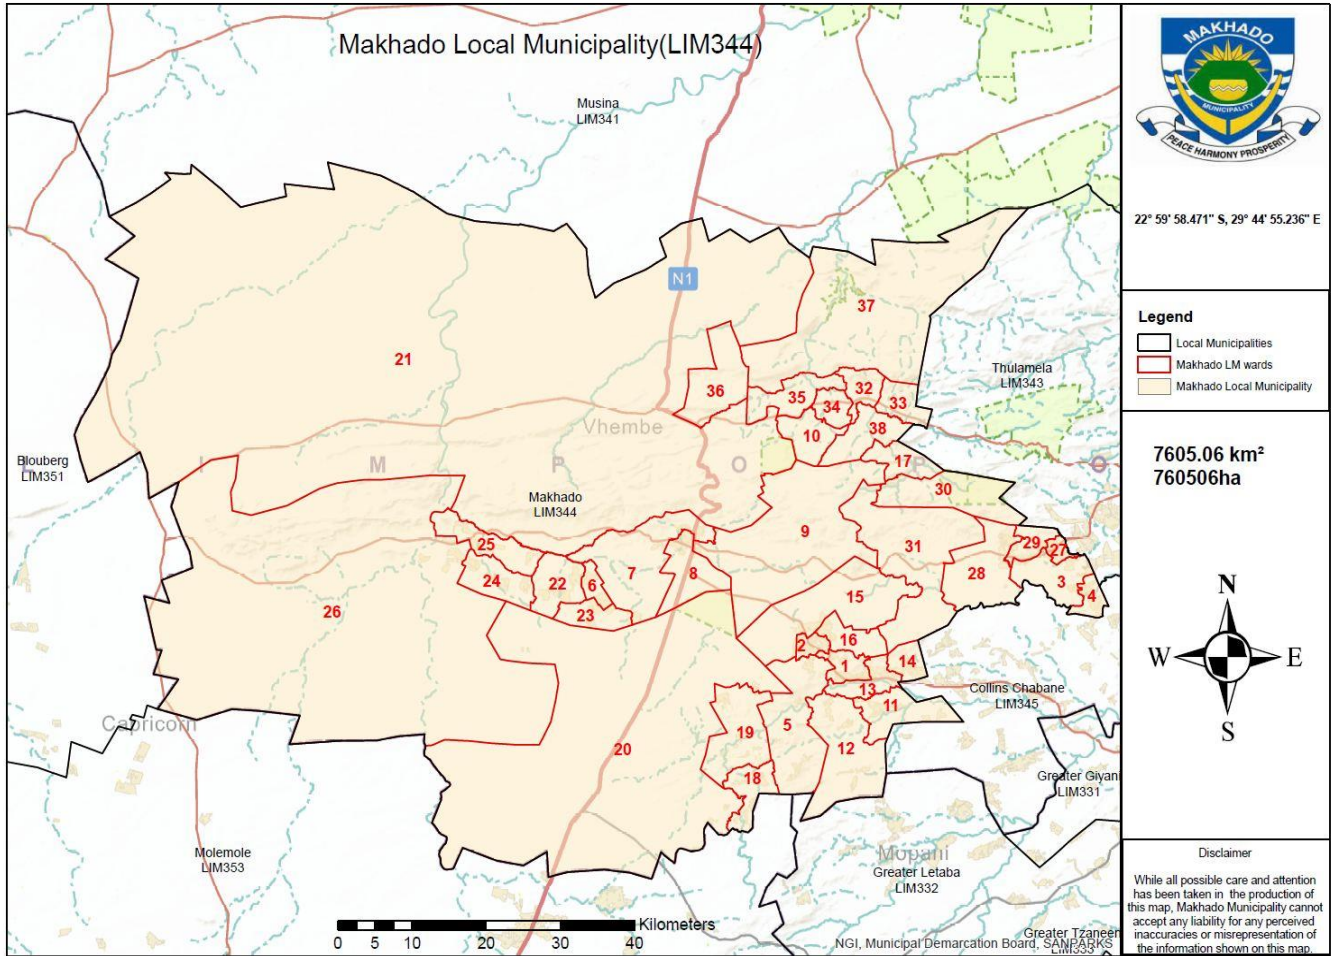

LOCATION AND DESCRIPTION

The Municipality is located in the northern parts of Limpopo Province (coordinates 23° 00' 00" S 29° 45' 00" E) approximately 100km from the Zimbabwean border along the N1 Route. (See Locality Map below).The municipal area is 7605,06 km² (or 760506 Hectares) in size and strategically located on a macro scale along a major passage between South Africa and the rest of the African continent. Approximately 416 728 people currently reside within the Municipality and based on the vastness of the rural populace the municipality can be classified as predominately rural.

Service Delivery Backlogs as at 2019		%
Population	416 728	
Number of Households	116 371	
Water Provision Backlog	35 623	30.6%
Electricity Provision Backlog	6756	
Sanitation Backlog	35 210	30.2%
Number of Households without refuse removal	99104	85.1%
Housing Backlog	16 207	13.9%
Existing service Delivery Level		
Number of Voters	145 147	34.8%
Indigent Households	6556	
Households Receiving free basic Electricity	6556	
Households Receiving free basic Water	101 132	86.9%

Table 1: Quick Facts and figures Source: Makhado Municipality March 2022

SECTION 2: VISION AND MISSION

VISION

A dynamic hub for socio-economic development by 2050

MISSION

To ensure effective utilisation of economic resources to address socio-economic imperatives through mining, tourism and agriculture.

VALUES

- Mutual respect and humility
- Ethical behaviour and leadership
- Community engagement
- Honesty and integrity
- Good governance
- Accountability
- Professionalism
- Quality service
- Unity and solidarity

SECTION 3: MUNICIPAL DEMOGRAPHIC PROFILE

MUNICIPAL PROFILE

DEMOGRAPHIC INFORMATION

The total population of Makhado has decrease from 516 031 in 2011 (Based on the 2011 census outcome) to 416 728 due to the new demarcation of the municipal boundries. The number of households have also decrease from 134 889 households (Census 2011) to 116 371 with about (145 147) registered voters. The Municipality is made up of 4 formal towns namely, Louis Trichardt, Vleifontein, Waterval and Dzanani with more than 200 villages. The main administrative office is situated in Louis Trichardt town with two supporting regional administrative offices in Dzanani, and Waterval.

The municipality has 38 ward councillors and 37 proportional councillors .There are 14 traditional leaders who are ex-officio members of the municipal council and 10 councillors who are members of the executive committee. The Municipality also has 38 established and fully functional ward committees.

Mortality and Fertility

The information provided in this section is based on the information as recorded and provided by Department of Health. The table below reflects that 8335 children were born in 2011 and 1798 people died during the same year, this figures do not however reflect unrecorded incidences. The figures provided reflect the number of deaths and birth as recorded per Hospital within Makhado Municipality.

At best, the figures provide an indication of the correlation between mortality and birth. Therefore based on the provided figures it can be deduced that the ratio of deaths to births recorded is approximately 1:4. Another limitation to this information is that the Hospitals indicated below provide a District service and the recorded information might be inclusive of the mortality and birth statistics of people coming from elsewhere.(Refer to the Table Below)

Institution	Birth		Death	
	Male	Female	Male	Female
Louis Trichardt Memorial Hospital	807	726	145	106
Elim Hospital	1897	1803	452	460
Silaom Hospital	1404	1698	307	328

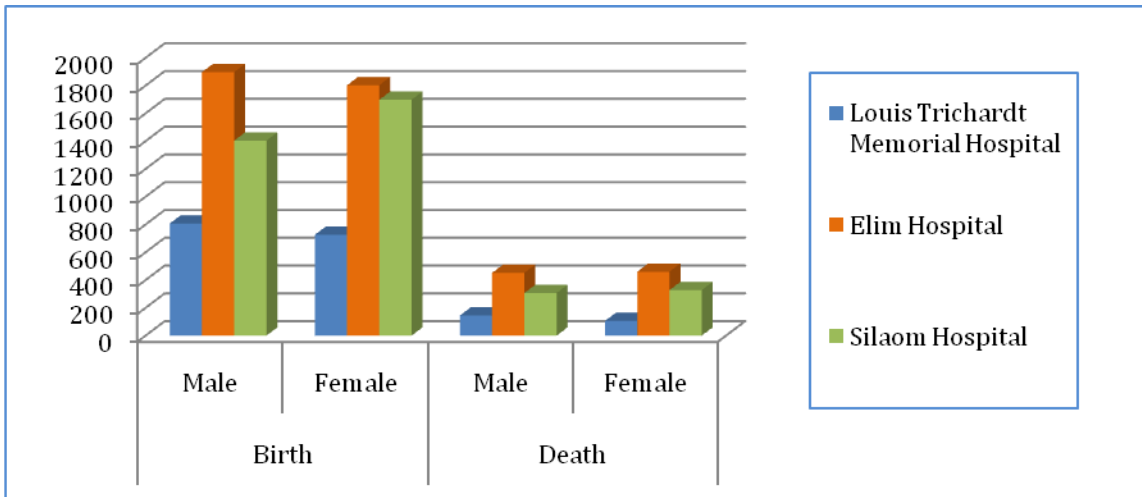

Figure 2: Deaths and Births per Hospital for 2011
Source: Information provided by Department of Health, 2012
(Own presentation and analysis)

Age Structure and Sex

Makhado Municipality is composed of 279 236 female and 236 795 male persons (Information source: Census 2011). The population has a youthful age structure and the immediate significance of this young age structure is that the population will grow rapidly in future and this implies a future high growth rate in the labour force. At present, the local economy is unable to provide sufficient employment opportunities to meet the needs of the economically active population. A youthful population structure also implies a relatively higher dependency ratio. From a socio-economic perspective, the main elements of the population can be summarised as follows:

Population Element	Percentage (%)
Economically active	46 %
Economically inactive	54%
Total	100%

The figures above clearly show the high percentage of the population that is economically inactive. This figure can be attributed to the high percentage of the population being under the age of 15, which per definition renders them economically inactive.

The largest percentage of the rural black population between the ages of 15 – 65 years comprises women. This can be attributed to the migration of men for employment opportunities elsewhere. The high level of male absenteeism implies that women are predominantly the key decision makers at home. The table below provides more details on age structure and sex.

Dwelling Types

The following table reflects the main dwelling types found in Makhado Municipality. Traditional residential areas account for 87% percent of the total households followed by formal residential areas presumably those found in Makhado Town and the R293 Townships.

Emuneration Area	Households
Formal residential	9 336
Informal residential	97
Traditional residential	117 428
Farms	6 960
Parks and recreation	11
Collective living quarters	122
Industrial	205
Small holdings	0
Vacant	633
Commercial	97
Total	134 889

Table 2: Census 2011, dwelling type by population group of head of the household
Source: Stats SA 2011 National Census, www.statsa.co.za

Makhado Household Trends

According to the recent Census findings (Census 2011) the number of households in Makhado Municipality have risen by about 24% from 108 978 in 2001 to 134 889 in 2011.

Census 2001	Census 2011	Increase	Percentage Increase
108 978	134 889	25 911	24%

Makhado Municipality has various challenges that need addressing through service delivery. These challenges range from the provision of basic services to the issues of poverty and unemployment. There are also opportunities that can assist the municipality in realising its developmental mandate. The following development challenges and opportunities are highlighted as critical:

Developmental Challenges and opportunities
Challenges
Illegal demarcation of sites
Unauthorized water and electricity usage
Theft and Vandalism of infrastructure
Illegal immigrants
Protests and Violence
Poor workmanship
Crime
National Electricity Generation Capacity constraints
High rate of HIV/AIDS and TB
Illegal dumping sites
Deforestation
Pollution
Climate change
Poaching
Land degradation and Illegal mining (quarrying)
Natural Disasters (Drought, floods, veldfires, Storms, Landslides)
Illegal public transport operations
Poverty and Unemployment
Stray Animals
Labour unrest
Low literacy rate
None payment of rates and taxes by rate payers
Opportunities
Availability of water sources and Service Infrastructure (Nandoni Dam)
Availability of Land
Tourism attraction areas (destinations)
Mining and Agricultural opportunities
Favourable climatic conditions for Agriculture
Training support from various sectors
Good Communication and Transport network
Accommodation& Lodges
Participation of sector department in IDP meetings
Good working relations amongst stakeholders
Game Farming

SECTION 4: POWERS AND FUNCTIONS

Makhado Local Municipality has powers and functions assigned to it in terms of the provisions of schedules 4 (B) and 5 (B) of the Constitution of the Republic of South Africa (Act 108 of 1996). The powers and functions of the Municipality are listed hereunder as follows:

<ul style="list-style-type: none"> • Building regulations • Electricity and gas reticulation • Local tourism • Municipal airports • Municipal planning • Municipal public works 	<ul style="list-style-type: none"> • Storm water management systems in built-up areas • Amusement facilities • Trading regulations • Billboards and the display of advertisements in public places • Cemeteries, funeral parlours and crematoria 	<ul style="list-style-type: none"> • Cleansing • Control of public nuisances • Control of undertakings that sell liquor to the public • Facilities for the accommodation, care and burial of animals • Fencing and fences • Licensing of dogs • Licensing and control of undertakings that sell food to the public • Local amenities 	<ul style="list-style-type: none"> • Local sport facilities • Markets • Municipal abattoirs • Municipal parks and recreation • Municipal roads • Noise pollution • Pounds • Public places • Refuse removal, refuse dumps and solid waste disposal • Street trading • Street lighting • Traffic and parking
---	---	--	--

Note must be taken that the Vhembe District Municipality is the water service authority and water service provider in accordance with an existing water service level agreement.

SECTION 5: IDP PROCESS OVERVIEW

Institutional arrangement to drive IDP process

In terms of the Municipal Systems Act, the chairperson of the executive committee or executive mayor or the chairperson of the committee of appointed councillors has the responsibility to manage the drafting of the IDP or to assign this responsibility to the municipal manager. The municipal manager is responsible for the implementation and monitoring of the IDP process. As such Makhado Local Municipality's organisational arrangement for driving the IDP process is as follows:

- **IDP Representative Forum**

The IDP representative forum is the structure which institutionalises and guarantees representative participation in the IDP process. The selection of members to the IDP representative forum has to be based on criteria which ensure geographical and social representation. The Municipality also publishes a notice on an annual basis in the local newspaper to invite interested stakeholders to participate in the process. The institutional arrangement for the Forum is as follows:

Chairperson – Makhado Municipal Mayor

Secretariat – Members of the IDP steering

Members- Members of the executive committee, Councillors, Traditional leaders, Ward committee members, Heads of Departments and senior officials, Stakeholder representatives of organised groups, Stakeholder representatives of unorganised groups, Resource persons including provincial sector departments and the district municipality; and community representatives.

- **Regional IDP Consultative Meetings**

Regional IDP Consultative meetings are decentralized units of the IDP Representative forum. They form the platform for more localized participation in IDP process and are constituted by the various stakeholders forming part of the IDP Representative Forum. The Regional IDP Consultative meetings resemble the IDP representative forum from a regional context. The institutional arrangement for the Consultative meetings is as follows:

Chairperson – Portfolio Chairperson for Economic Development, Traditional Affairs and Planning

Secretariat – Members of the IDP steering

Members- Councillors, Traditional leaders, Ward committee members, Heads of Departments and senior officials, Stakeholder representatives of organised groups, Stakeholder representatives of unorganised groups, Resource persons including provincial sector departments and the district municipality; and community representatives.

- **IDP Steering Committee**

The steering committee is a technical working team of dedicated heads of departments and senior officials who support the IDP manager to ensure a smooth planning process. The IDP manager is responsible for the process, but will often delegate functions to members of the steering committee. The following institutional arrangement exists within the Municipality.

Chairperson – Municipal manager

Members – Heads of Departments and Senior Officials

Secretariat – IDP Manager/IDP Coordinator

The elected council is the ultimate decision-making forum on IDP. The role of participatory democracy is to inform, negotiate and comment on those decisions, in the course of the planning process.

The institutional arrangement is reflected in detail as follows:

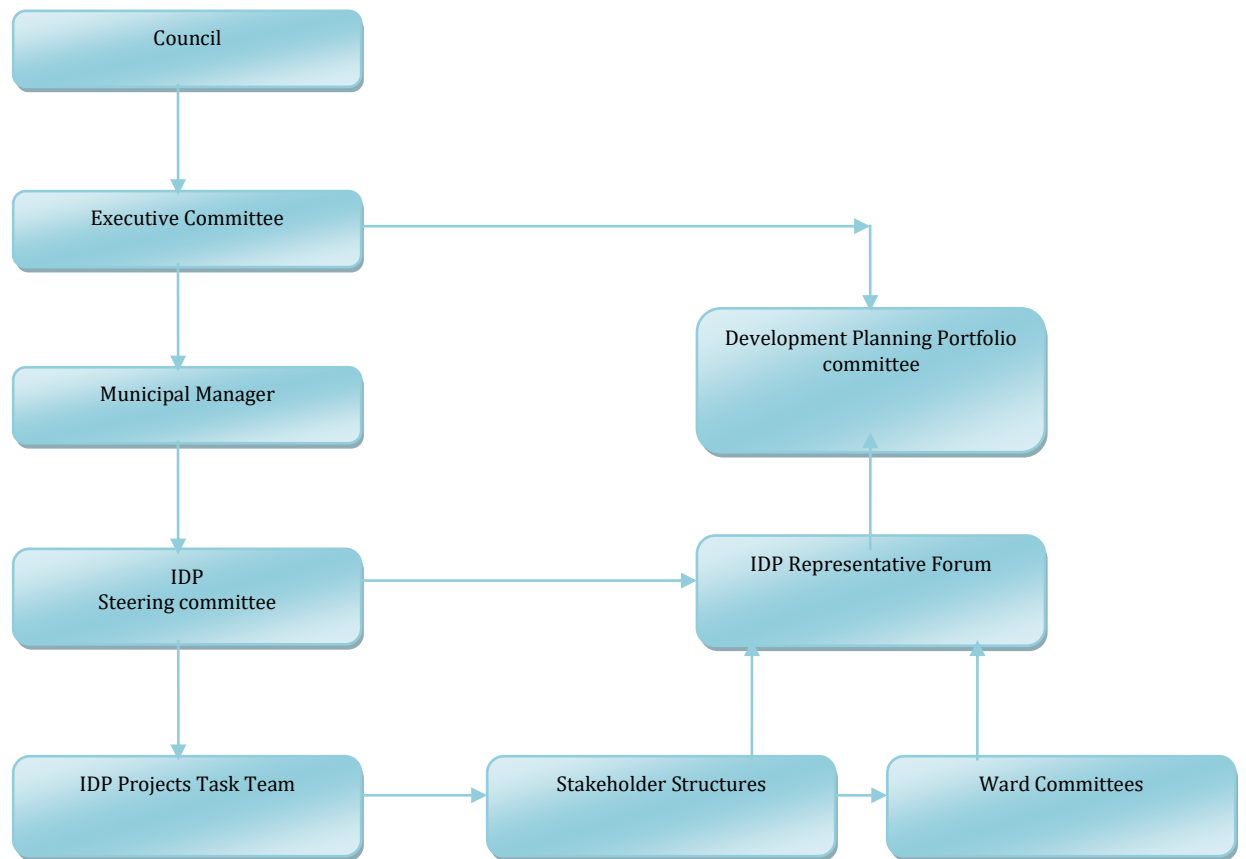

Figure 3: Makhado Institutional Arrangement Schedule

IDP PROCESS OVERVIEW

In terms of section 25 of the Municipal System Act 32 of 2000, a Municipal Council must develop its integrated development plan inline with its term of office and it must be reviewed annually in accordance with an assessment of its performance measurements in terms of section 41; and the extent that changing circumstances so demand; and may amend its integrated development plan in accordance with a prescribed process.

- Link, integrate and coordinate plans and takes into account proposals for the development of the municipality.
- Align the resources and capacity of the municipality with the implementation of the plan.
- Form the policy framework and general basis on which the annual budget must be based.
- Comply with the provision of the chapter and must be compatible with National and Provincial developmental plans and planning requirements binding on the municipality in terms of legislation.

This Integrated Development Plan (IDP) is a product of the 2021/22 IDP process and represents the 2022/23-2026/27 Draft IDP for Makhado Municipality. It is furthermore the principal strategic planning instrument which guides and informs all planning, budgeting, management and decision-making processes in the municipality.

IDP Rooster Meetings

Municipality	IDP Outcome	IDP-SDBIP Alignment	Overall Rating
Makhado	High	Aligned	High

SECTION 6: SPATIAL ECONOMY AND DEVELOPMENT RATIONALE

SPATIAL RATIONALE

The Spatial Development Framework forms one of the core component of a municipality's IDP as prescribed in Section 26(e) of the Local Government: Municipal Systems Act, 2000 (Act 32 of 2000). The SDF is therefore the principal planning document, which should inform all decisions pertaining to spatial planning, development and land use within the municipal area.

The main objective of the spatial analysis is to provide an overview of the municipality's spatial structure/pattern in order to effectively guide all decisions that involve the use and development of land or planning for the future use and development of land. These decisions include:

- Land use management decisions on applications for the change in land use, such as rezoning or subdivision applications
- Decisions on where and how public funds (municipal and other government agencies) are invested, such as extension of bulk service networks, or provision of community facilities
- Guide developers and investors to appropriate locations and forms of development.

The major policy documents or plans with direct impact which need to be highlighted in this part of the IDP include:

(i) National Development Plan

The National Development Plan aims to eliminate poverty and reduce inequality by 2030. South Africa can realise these goals by drawing on the energies of its people, growing an inclusive economy, building capabilities, enhancing the capacity of the state, and promoting leadership and partnerships throughout society. It is a plan for South Africa and it provides a broad strategic framework to guide key choices and actions. Given the complexity of national development, the plan sets out six interlinked priorities:

- Uniting all South Africans around a common programme to achieve prosperity and equity.
- Promoting active citizenry to strengthen development, democracy and accountability.
- Bringing about faster economic growth,
- Higher investment and greater labour absorption. Focusing on key capabilities of people and the state.
- Building a capable and developmental state.
- Encouraging strong leadership throughout society to work together.

(ii) The Limpopo Spatial Rationale

The Limpopo Spatial Rationale, 2002 proposed a hierarchy of settlements for the province by identifying different levels and scales of growth points and population concentration points. This strategy identifies criteria that should be used to identify the category of any settlements within the pre-determined hierarchy. From the criteria it is therefore possible to assign any settlement found within Makhado Municipality to its rightful position in the hierarchy.

(iii) Vhembe District Spatial Development Framework

The Vhembe District Municipality SDF, 2009 is significantly consistent with the recommendations and proposals contained in the Limpopo SDF 2007, especially the Spatial Development Framework map. However, not too much other detailed proposals and maps are included which can guide this section in addition to those proposals contained in the Limpopo Province SDF, 2007. Hence the District SDF will not be discussed in detail in this paragraph.

(iv) The Makhado Spatial Development Framework

The Makhado Municipality's Spatial Development Framework and Land Use Management System are aligned to the aforementioned Plans in order to effectively guide all decisions that involve the use and development of land or planning for the future use and development of land.

Spatial Location and Description

Makhado Local Municipality is located in the northern parts of Limpopo Province (coordinates 23° 00' 00" S 29° 45' 00" E) approximately 100km from the Zimbabwean border along the N1 Route. (See Locality Map below).The municipal area is 6698.294 km² (or 669829.4 Hectares) in size and strategically located on a macro scale along a major passage between South Africa and the rest of the African continent. Approximately 416 728 people currently reside within the Municipality and based on the vastness of the rural populace the municipality can be classified as predominately rural with a population density of 67 persons per square kilometer.

From a Provincial perspective the Municipality forms part of the Vhembe District Municipality together with Musina, Thulamela and Colins Chabane and can be considered as an important bypass for people travelling between Polokwane, Musina, Thohoyandou, Zimbabwe and the Kruger National

Park. Other local municipalities bordering the municipality are the Molemole and Blouberg Local Municipalities forming part of the Capricorn District Municipality, whilst the Greater Giyani and Greater Letaba Municipalities also boarder the municipality from the South East and form part of the Mopani District Municipality.

Makhado Local Municipality consists of 38 wards and is furthermore divided into four sub-regional administrative areas namely, remainder part of Luvuvhu, Dzanani, Waterval and Makhado.

Hierarchy of Settlements

Criteria Used to Determine Hierarchy

The criteria used to identify different settlement hierarchies are derived from the Limpopo Spatial Rationale. The following criteria played a very important role in the identification of settlement clusters and also in the identification of growth points and population concentration points in the municipal area:

- **Population size** - concentration of relatively large numbers of people)
- **Population density**- being the number of people per hectare per settlement
- **Settlements or a group of settlements, which are located, close to each other.** Smaller settlements have been included where they may functionally form part of the settlement cluster and therefore the growth point/s or population concentration within such a settlement cluster.
- **The location of individual settlements or group of settlements along main arterials (e.g. National, provincial or main district roads) which are usually tarred roads.** Not all the settlements are directly adjacent to these main roads or intersections of main district roads. Other Settlements which are within close proximity to these roads have in some instances also been included
- **The location of existing health infrastructure such as clinics, but more specifically health centers and hospitals.** Clinics are situated throughout rural areas, often in small settlements. Growth points and many of the population concentrations have higher health facilities or have more than one clinic situated within the population concentration.
- **The location of tertiary education facilities.** These facilities are usually located in higher order nodes such as growth points and sometimes in population concentration points. Although primary and secondary schools occur throughout the Vhembe District, a municipality's consideration was given to the location of these schools in the identified growth points and population concentrations. Most of these nodes have a significant number of primary and secondary schools located within the cluster area.
- **The location of government offices, as well as local municipality and district municipality offices were considered with the identification of priority development nodes.** By far the majority of these office functions are situated within growth points or population concentrations. Provincial and regional office functions are, however, within the identified growth points.
- **Existing economic activities such as businesses, mining activities in or in close proximity of these development clusters have also played an important role in the identification of clusters with growth points and population concentrations within these settlement clusters.**

- **The availability of water (both bulk and internal reticulation) has been considered to some extent in the identification of the proposed hierarchy of settlements.** The present levels of internal water supply (in terms of RDP standards) were investigated and were considered with the identification of settlement clusters, but to a lesser extent. Furthermore, the availability of bulk water supply over the short to longer term has also been considered but generally not regarded as a disqualifying factor. In some of the local municipal areas, the water supply levels are so low that if it is used as a key element for evaluation no meaningful nodes can be identified as growth points or significant population concentrations for future development.

The above-mentioned criteria were applied as far as possible with the identification of the settlement hierarchy. Some of the settlements are relatively small, while large areas consist of commercial farms and smallholdings.

The above-mentioned criteria were therefore applied less rigidly in the identification of an appropriate settlement hierarchy for these local municipality areas. It can be stated that depending on the local circumstances this criteria was applied with some flexibility to accommodate the specific prevailing circumstances in an area.

Selected rural settlements (e.g. growth points and population concentrations) are likely to grow in terms of population size and local economic development. The population sizes together with local economic development potential will result in the natural growth of these settlements, which in turn could form the basis for longer term sustainable growth and development. It is envisaged that growth and development of the selected identified priority development nodes (e.g. growth points and population concentration points) will ultimately result in a gradual decline of other smaller settlements in the rural areas. At present, there is already a tendency for people to migrate from smaller settlements to larger settlements in the district or to neighbouring districts and even to other provinces.

Hierarchy and Order of Settlements

The revision of the Limpopo Spatial Rationale (2002) proposed a hierarchy of settlements based on the new local government structure, as well as on policies and information that was not available during the compilation of the original Limpopo spatial rationale document in 1999. According to the Municipal SDF the Limpopo Spatial Rationale, 2002 is since outdated, therefore for the purpose of this section the hierarchy of settlements will therefore be interpreted according to the latest (reviewed) version of the provincial planning document, titled Limpopo Spatial Development Framework, 2007. The proposed settlement hierarchy for Makhado local municipality in terms of the document can be described as follows:

- **1st Order Settlements** – Settlements which include the provincial growth points, district growth points and the municipal growth points.
- **2nd Order Settlements** – Settlements which comprise of the Population concentration points.
- **3rd Order settlements.** – Settlements which are local service points.

In due consideration of the above, the following tables provide a comprehensive outline of the latest proposals in respect of the hierarchy of settlements for Makhado Municipality, namely. A map depicting the information provided below is also inserted hereunder for reference.

Hierarchic Order of Settlement	Type	Cluster name	Settlement within cluster
1 ST Order Settlement (Growth Points)	PGP	Makhado Provincial Growth Point	Louis Trichardt Town including Tshikota
	DGP	Elim/Waterval District	Elim/Waterval rural;

Hierarchic Order of Settlement	Type	Cluster name	Settlement within cluster
2 ND Order Settlement (Population Concentration Points)	MGP	Growth Point Madombidzha Municipal Growth Point	Mpheni; & Waterval urban. Depot Village; Dzumbathoho; Madombidza Zone 1; Madombidza; Madombidza Zone 2; Madombidza Zone 3; &Rathidili.
	PCP	Ravele Tshino Tshakhuma Maebane	See Table 2.4.2.2 a See Table 2.4.2.2 b See Table 2.4.2.2 c See Table 2.4.2.2 d See Table 2.4.2.2 e

Land Use

The majority of the population reside in rural areas. The rural areas are the most underdeveloped with large open spaces. Large sections of the open spaces are used for farming purposes with approximately 10 478 farms in the Municipal area. The establishment of the Soutpansberg Conservancy should significantly boost the local tourism sector.

Most of the areas in-between settlements are utilised for farming purposes resulting in these areas being under constant threat of environmental degradation. The physical development in these areas largely takes place in reaction to new needs that manifest over time. Large disparities exist between the different communities with regard to their respective levels of development. The size of the Municipality has brought about a situation where there are villages that are fairly well developed in contrast with other rural areas, which have developed very slowly. In addition to this, there are

villages which have over time proven themselves as natural growth centres (villages that have larger populations with better infrastructure but not proclaimed). Due to continued urbanisation, there is an urgent need to provide housing in order to avert uncontrolled settlement.

Land in the rural areas is held in trust by government for the traditional authorities. The relevant legislations make private land ownership impossible. In such cases, the individual has to get the necessary approval from the traditional council, the site has to be properly surveyed, and the diagram submitted to the offices of the Land Surveyor General in Pretoria for approval. In practice there are few examples of people getting private land ownership in this manner, as traditional councils are in general very hesitant to part with their land. At present the dominant form of land ownership in the rural areas is the Permission to Occupy (PTO). A PTO does not constitute full private ownership and can therefore not be used as collateral at any of the commercial banks.

Some of the current land development legislation is applicable to certain areas, which complicates development within the municipality. Some of the legislations have been delegated to the Municipality, but most of the former homelands legislations are still vested with the province. This makes it almost impossible for the Municipality to have thorough control over its area of jurisdiction in terms of land uses and the payments of rates and taxes. Apart from the variety of legislations applicable in certain areas, a numbers of stakeholders are also involved in the allocation and use of land. These are Traditional councils, the Municipality and the department of Cooperative Governance, Human Settlement and Traditional Affairs, this situation further contributes to a lack of development, specifically in the rural areas.

On a macro scale the majority of prevailing land uses within the Municipality include, commercial, conservation, cultivated land, forestry, mining, residential, subsistence farming and large pockets of unspecified land parcels, fundamentally zoned agricultural. The base land use map (figure 2.2.3) below reflects the aforementioned.

Figure 5: Micro Land Use

Transportation Networks

Roads

In the Limpopo Province there are four major provincial development corridors, namely the Phalaborwa Corridor, the Dilokong Corridor, the East-West Corridor and the Trans-Limpopo Corridor. The Trans-Limpopo Corridor proceeds through the Makhado Municipality and follows the N1-National Road from Polokwane in the south through Makhado into Musina and Zimbabwe in the north.

The following table shows the significant freight and transportation network in the Municipality.

Route No.	Short Description	Description of route & significance
N1	Polokwane-Makhado-Musina	Forms part of the Trans-Limpopo Corridor which proceeds through the Makhado Municipality and follows the N1- National Road from Polokwane in the south through Makhado into Musina and Zimbabwe in the north.
R 523	Alldays - N1 - Thohoyandou	Linking from R521 from Vivo/Alldays (Blouberg) in the west and into an eastern direction to the N1, where it crosses the N1 north of the Soutpansberg and passes through Ndzhelele and proceeds east towards Sibasa & Thohoyandou (Thulamela) and finally towards the Kruger National Park.
R 522	Vivo-Makhado	Linking from R521 from Vivo in the west into an eastern direction south of the Soutpansberg into Louis Trichardt town and the N1.
R 524	Makhado-Thohoyandou	From Louis Trichardt Town and the N1 it proceeds south of the Soutpansberg into an eastwards direction to Thohoyandou (Thulamela) and the Kruger National Park.
R 578	Makhado - Giyani	From Louis Trichardt Town it proceeds into a south-eastern direction towards Giyani (Greater Giyani)

It is also important to reflect that the N1 route proceeds in a north-south direction (almost in the middle) through the municipal area via the Hendrik Verwoerd tunnel through the Soutpansberg conservancy, linking South Africa with the north.

On the other hand, the provincial (link) roads run in an east-west direction, all linking with the N1 in one way or the other. Some proceed parallel north and others parallel south of the Soutpansberg, linking the region and adjacent municipalities to Makhado and the N1, resulting in a good network of major secondary access routes

The map below reflects the network linkage between the aforementioned routes.

Figure 6: Major Transportation Networks within the Municipality

Source: Makhado SDF, 2011

Railway line and Airports

There is a major railway line passing from the south through the Makhado municipal area up towards Louis Trichardt town. From Makhado it turns west towards the direction of Maebane. From Maebane it turns north through the mountain and through Waterpoort and proceeds towards Musina. Makhado has one civil aerodrome/airport west of Louis Trichardt town for use by smaller aircraft and use for private air travel and small commercial air dispatch. Makhado Municipality also houses the Makhado Air Force Base of the South African Air Force (SAAF), which serves as a strategic military installation for the South African Defense Force Nationally.

The map below reflects the rail network passing through Makhado Municipality.

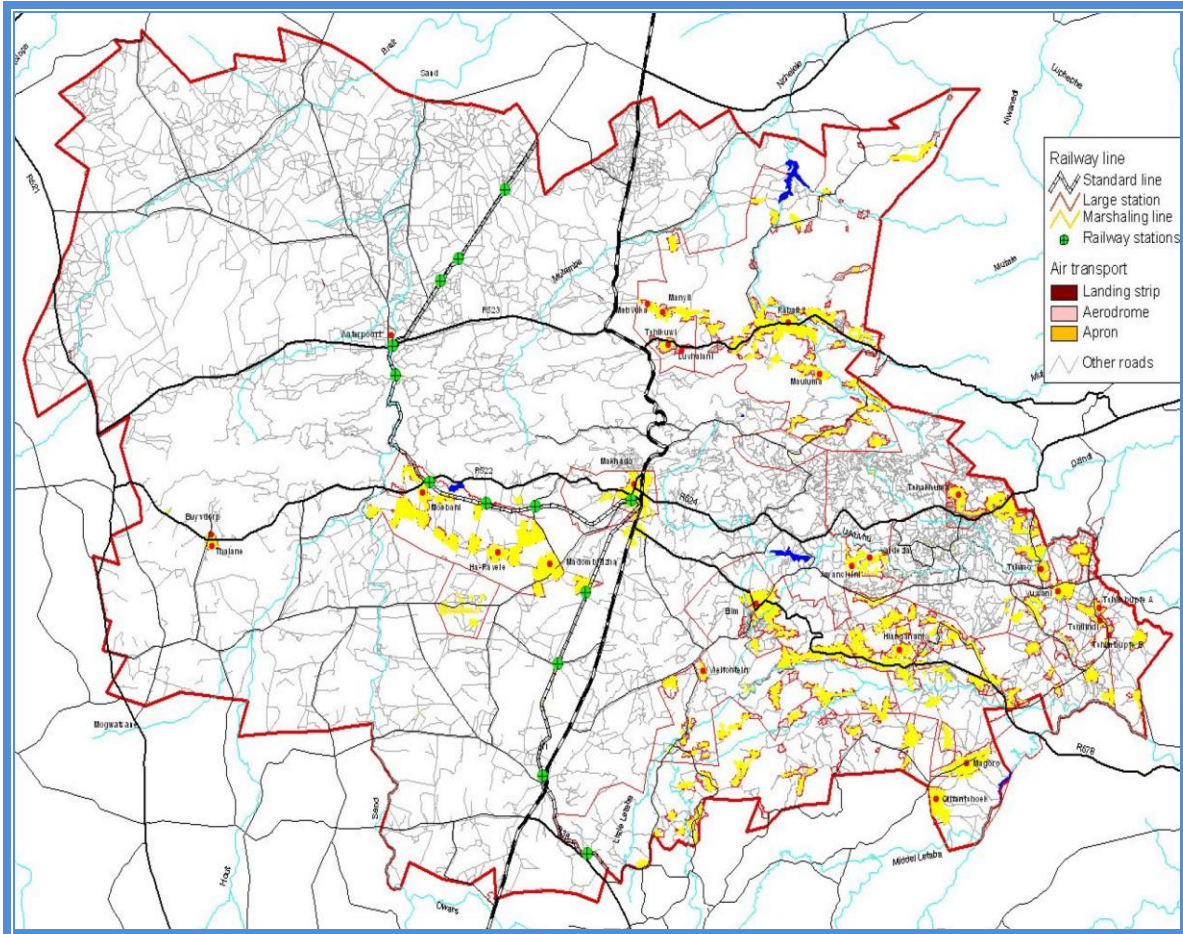

Figure 7: Rail line and Airports within the Municipality

Land Administration

Land Ownership

Land ownership in the area is characterised by private ownership in proclaimed townships, state ownership (departments, Makhado Municipality, etc), and tribal land which is held in trust by traditional leaders. In tribal areas the dominant form of land tenure is the Permission to Occupy (PTO).

The majority of inhabited land within the municipality is owned by government in various forms. This category includes tribal land, land held by government departments but excluding parastatals, and the latter accounts for nearly 2.79% of the land. Land held under private ownership accounts for about 49.31% of the total land in Makhado. The table below depicts the types of land tenure and percentage distribution within the Municipality.

CATEGORY	TOTAL LAND (Ha)	PERCENTAGE (%)
Government	374400.923	29.91%
Parastatal	34977.659	2.79%
Private	617106.097	49.31%
Unspecified	12577.179	1.00%

Table 11: Land Ownership
Source: Makhado LED Strategy Review 2012

The VDM Land Audit further reveals that government owned land is distributed in large pockets in the north-eastern portion of the Louis Trichardt town within the former Venda homeland area, eastern and south-eastern portion of the Municipality within the former Venda and Gazankulu homeland areas and south-west of the Louis Trichardt town within the former Venda area. Private land is located primarily through the central and western portions of the Municipality with the exception of the Levubu area along the R524.

Land Tenure Status

The table below reflects the land tenure status of households in Makhado.

Tenure Status	Households
Owned but not yet paid off	5 750
Occupied rent-free	38 520
Owned and fully paid off	78 113
Other	2 140
Total	124 523

Land Claims

Makhado Municipality has numerous land claims lodged with the Department of Rural Development and Land Reform. For the purpose of this section it is important to mention that there is a lack of current or updated information on claims. The following tables reflect the number of land claims lodged in Makhado Municipality.

NUMBER OF CLAIMS LODGED	1042	Total within the DISTRICT
Number of Claims Settled	898	+ 13 which are settled in part =911
Urban Claims	129	
Rural Claims	748	
Outstanding claims	124

Physical Environment

To clarify the physical impediments, constraints and opportunities on future development, it is necessary to provide a picture of the form giving elements such as

- Important natural features (mountains, rivers, wetlands, vegetation types) or resources (e.g. minerals, marine resources);
- Environmentally sensitive conservation and recreation areas;
- Slope gradients;
- Noteworthy geological conditions such as areas of under-mining or dolomitic areas with potential subsidence problems;
- Soil conditions – particularly indicate those areas susceptible to erosion or with poor stability; and shade areas where these factors constrain and/or prevent development due to excessive financial implications or because of potential damage to the environment.

To avoid duplication, a full section is dedicated to the above in later parts of the document under sub heading Environmental Analysis. For the purpose of this section only the following spatial form giving elements are provided.

Spatial Form giving Elements

The Major form giving elements are listed hereunder as follows:

- The hierarchy of settlements with specific reference to Growth Points & Population Concentration Points;
- The Soutpansberg Mountain range/escarpment;
- Major areas of environmental sensitivity and nature conservation areas;
- Trans-Limpopo Corridor, i.e. the N1 route;
- Provincial higher order routes, i.e. R523; R522; R524 & R578;
- Areas with agricultural potential to west of the study area and north of the Soutpansberg;
- Areas where subsistence and small scale farming occurs, which overlaps with Traditional Authority areas;

- Areas under control of Traditional Authorities and overlapping areas where substantial number and concentration of land claims have been lodged;
- Areas with mining potential north of the Soutpansberg.

Spatial Challenges and Opportunities

The purpose of this section is to give an overall view of the spatial challenges as well as opportunities that exist within the municipality. The prevailing spatial challenges and opportunities are listed hereunder as follows:

Spatial Challenges	Spatial Opportunities
<ul style="list-style-type: none"> • Non-transfer of R293 townships, these townships are still largely controlled by the province. • Lack of integrated human settlements development in town. • The demarcation of sites by traditional authorities creates service backlogs. • Tribal land has a significant impact on development. Ownership is restricted and controlled outside the normal land ownership arrangements. • The development and growth of the urban core is limited because of ongoing land claims. • The land restitution process restricts investment and the development of land. 	<ul style="list-style-type: none"> • The municipal area has a well developed road and rail network. The road network includes links to the N1 running north-south through the area and the Trans-Limpopo corridor • The municipality owns substantial amount of land for residential development. • There is also a land use management scheme in operation within the town including a densification policy. • There are areas for urban development. • Biodiversity protection areas such as the Soutpansberg biosphere. • Farming areas, namely, Commercial farming areas; and small scale or subsistence farming areas. • Areas with mineral potential.

Spatial Development Framework

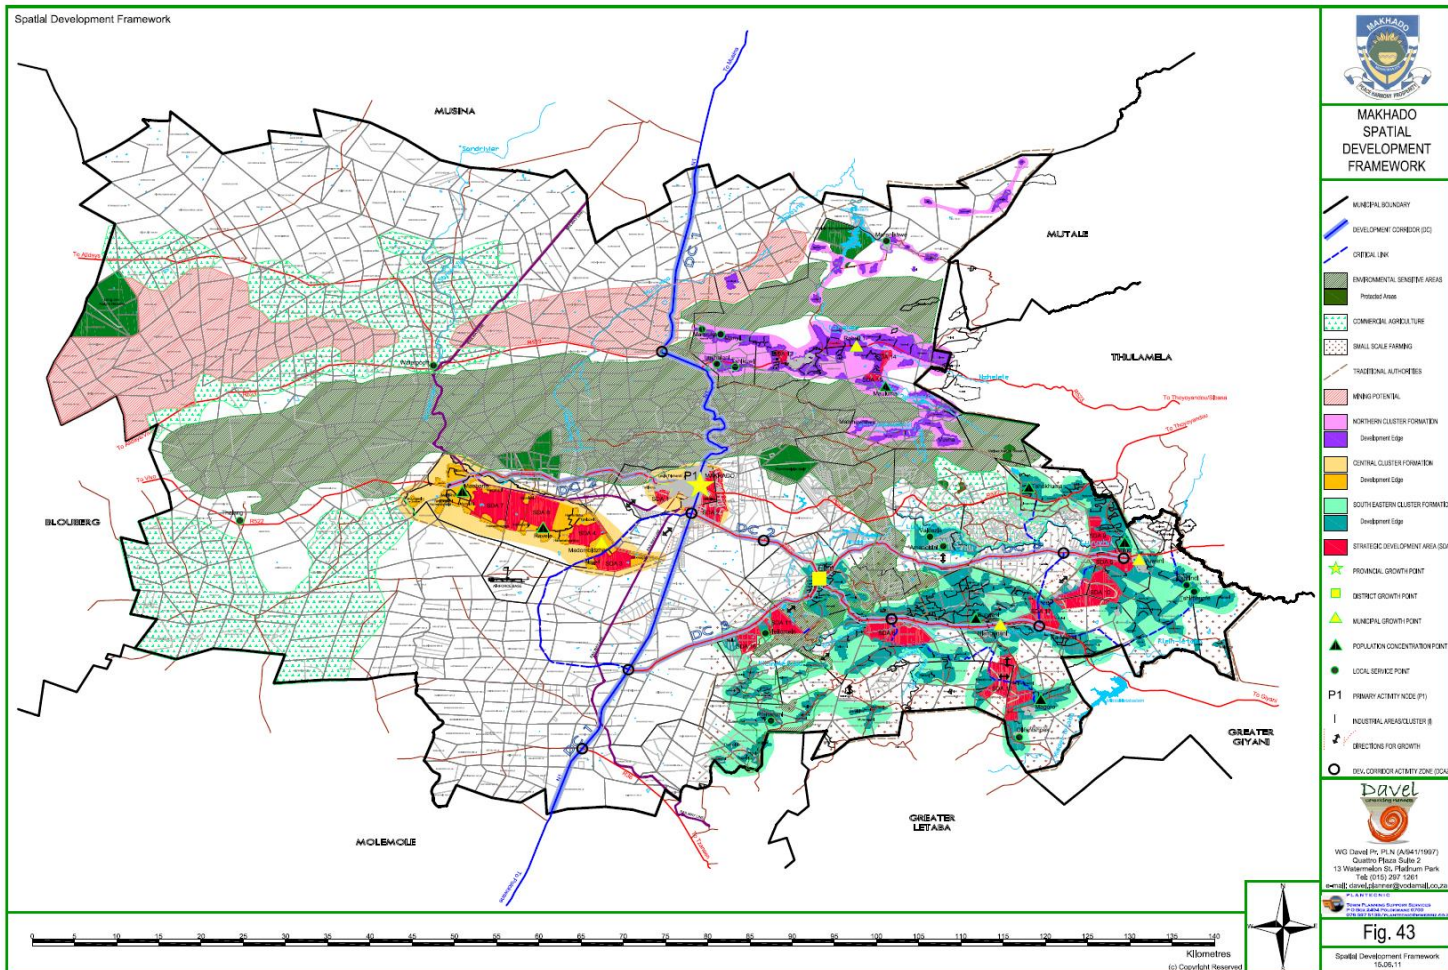

Figure 8: Spatial Development Framework

SECTION 7: ENVIRONMENTAL AND SOCIAL ANALYSIS

7.1 .ENVIRONMENTAL ANALYSIS

Geology & soils

The general geomorphology of the land in the Municipal area is shown in the figure hereunder. In respect of the geomorphology landscape, 13,61% of the total areas is known as Lowveld, 8,4% as the Great Escarpment, 17,24% as Soutpansberg, 34% as the Limpopo Flats, and 26,02% as the Polokwane Plains. The general soil description is also provided in Figure hereunder. With regard to soils, it is subsequently important to consider the soil potential of land as indicated hereunder since this is the final indicator of suitability of the geology and soil composition to undertake activities such as agriculture on the land. The soil potential as reflected in Figure 9 is further set out in the table below.

Soil Potential	%
No dominant class 13.10%	13,10%
Not suitable for agriculture or commercial forestry; suitable for conservation, recreation or water catchments.	7,85%
Soils not suitable for arable agriculture; suitable for forestry or grazing where climate permits.	16,05%
Soils of poor suitability for arable agriculture where climate permits.	23.12%
Soils of intermediate suitability for arable agriculture where climate permits.	31.22%
Soils highly suited to arable agriculture where climate permits	8.54%
Water bodies	0.13%
Total	100%

**Table 13: Soil Potential
Makhado SDF, 2011**

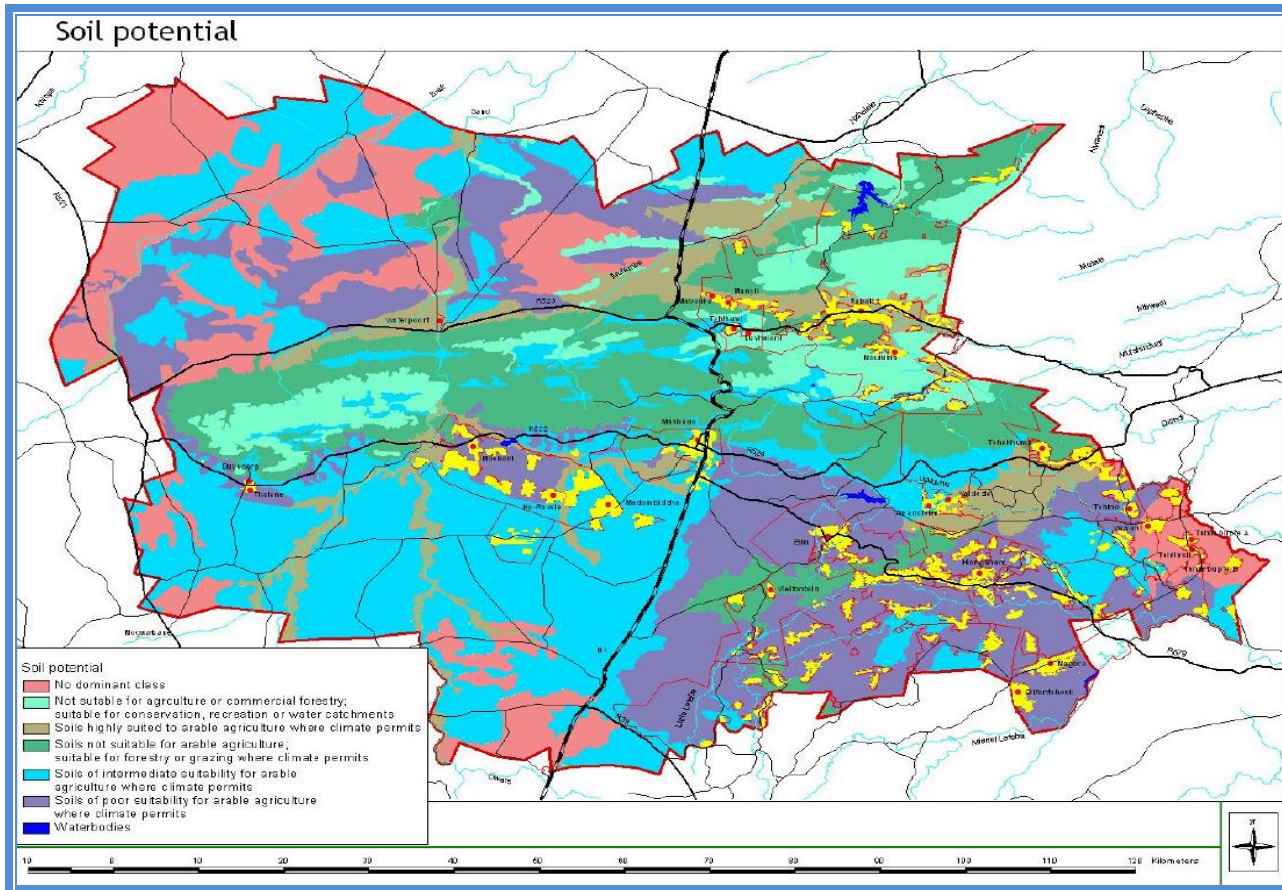

Figure 9: Soil Potential
Source Makhado SDF, 2011

In general, the soils suitable to support agriculture where climate permits are restricted to less than 40% of the total land area and furthermore restricted to the western and central parts of the study area. From a planning point of view it should be noted that those areas are fortunately also the less populated and urbanized.

Climate & rainfall

The climate for the municipal area ranges between 18 degrees Celsius in the mountainous areas to 28 degrees Celsius in the rest of the area, with an average of 25, 5 degrees Celsius. Maximum temperatures occur during the month of January while the minimum temperatures occur in July. The main period for rainfall is January to February with an annual rainfall of 450mm in the low-lying plains to 2300mm in the Soutpansberg. The general average rainfall for the Municipal area ranges between 450mm to 800mm. The areas north of the Soutpansberg have less rainfall than the lower western foothills and central and eastern high lying areas of the mountain itself. In conclusion, higher rainfall occurs on the higher lying areas of the Soutpansberg and foothills of the mountain.

Topography and slopes

The topography of the area is shown in Figure 10 hereunder and this shows that large areas of the municipal area is characterised by a mountainous makeup. It should also be noted that although settlements are mostly located on slopes less than 9% (1:10), many of the urbanized areas (settlements) are located between the mountainous areas with slopes between 9%-25%, in other words slopes between 1:10 to 1:4.

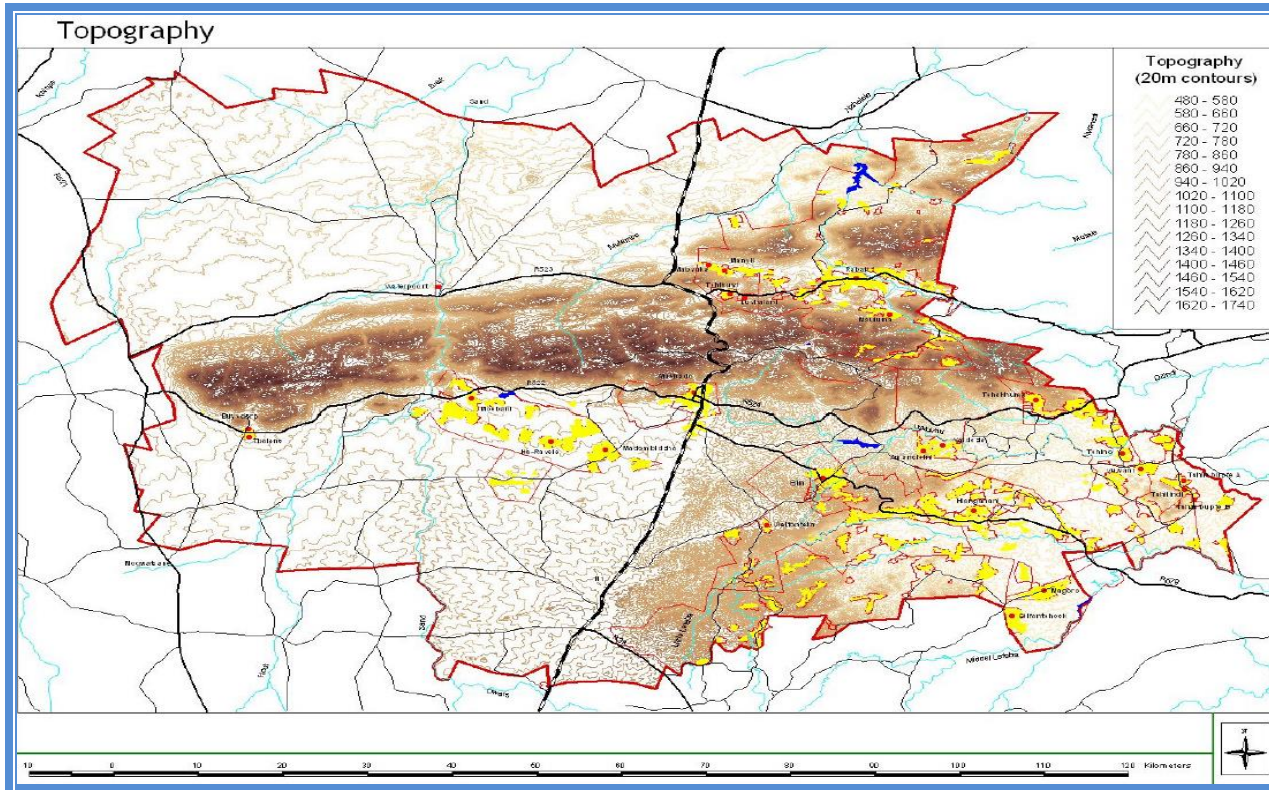

Figure 10: Topography and Slopes
Source: Makhado SDF, 2011

Hydrology

The river systems and dams are indicated in Figure 11 hereunder. These systems form part of the two major systems or catchment areas, namely the Limpopo and Olifants primary catchment areas respectively comprising 85,65% and 14,35%. The major river systems in these catchment areas include the Sand and Hout river system, the Luvuvhu river system, the Little Letaba river and Nzhelele river system.

It is more important for purposes of forward planning to focus on the protection status of the water source - rivers. As mentioned above, Figure 2.7.4 shows rivers that are regarded as "critically endangered", "endangered", "not threatened" and "vulnerable". The following rivers are regarded as either endangered or critical endangered and even vulnerable, namely: Dorinspruit, Sand (upper parts), Hout, Little Letaba, Soeketse, Middel Letaba, Luvuvhu (lower parts), Latonyanda, Mutshedzi, Tshiluvhadi, Dzindi, Mutshundudi, Mutamba, Nzhelele and Nwanedzi Rivers.

Figure 11: Status of Rivers
Source: Makhado SDF, 2011

Biodiversity & vegetation

Large areas in the Municipal are lie vacant and are largely covered by natural bushveld. Subsistence farming on the other hand occurs in areas where rural villages and traditional authorities occur, to the southeast of the study area, whilst cultivated land occurs in the western part of the study area south of the Soutpansberg. The protection level of these vegetation types as set out above, are indicated in the following table.

Veld type	Protection level	% of total
Limpopo Sweet Bushveld	Hardly protected	28.26%
Makhado Sweet Bushveld	Hardly protected	25.10%
Limpopo Ridge Bushveld	Moderately protected	0.38%
Soutpansberg Summit Sourveld	Moderately protected	0.14%
Granite Lowveld Bushveld	Moderately protected	6.46%
Subtropical Salt Pans	Moderately protected	0.00%
Gravelotte Rocky Bushveld	Not protected	0.10%
Tzaneen Sour Lowveld	Poorly protected	8.31%
Musina Mopane Bushveld	Poorly protected	21.68%
Northern Mistbelt Forest	Poorly protected	0.18%
Soutpansberg Mountain Bushveld	Poorly protected	9.39%
TOTAL:		100.00%

Source Makhado SDF, 2011

There are also other isolated spots north of the mountain, which are used for cultivated farming purposes. Forestry or plantations occur in the mountainous Soutpansberg. The character of veld types are described in figure 12 hereunder as well as the Fauna and Flora occurrence as indicated in Figure 13.

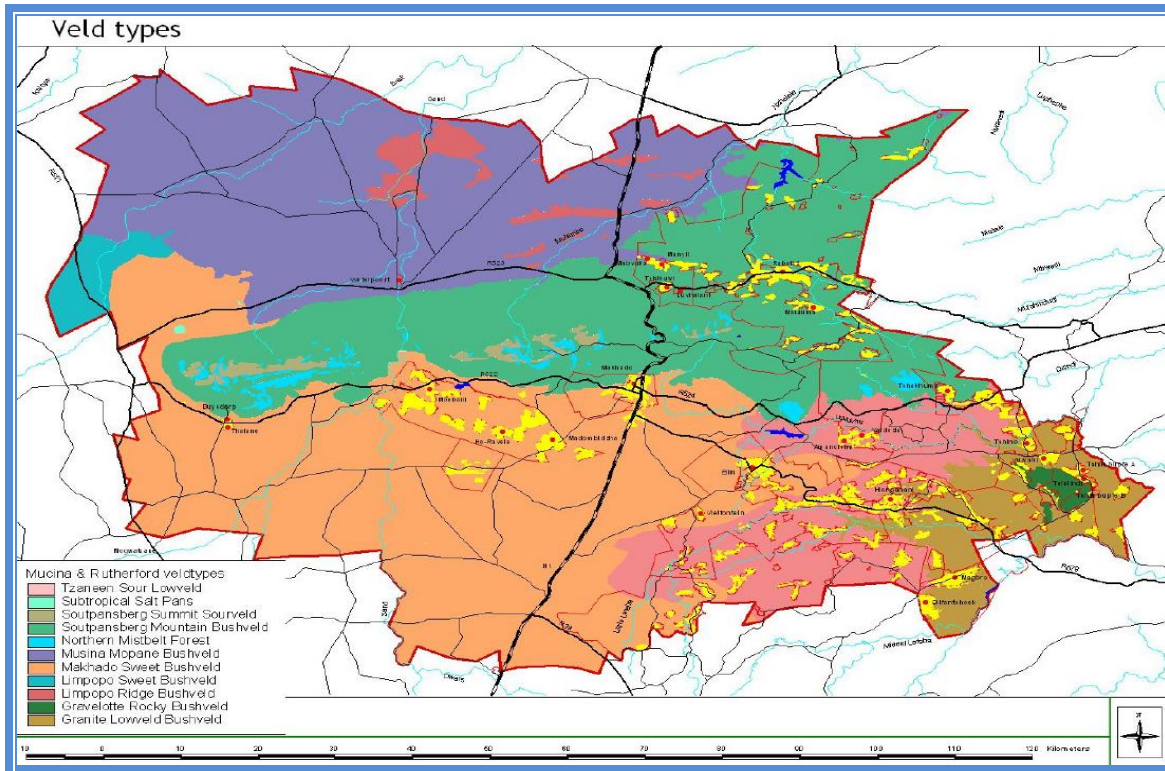

Figure 12: Veld Types
Source: Makhado SDF, 2011

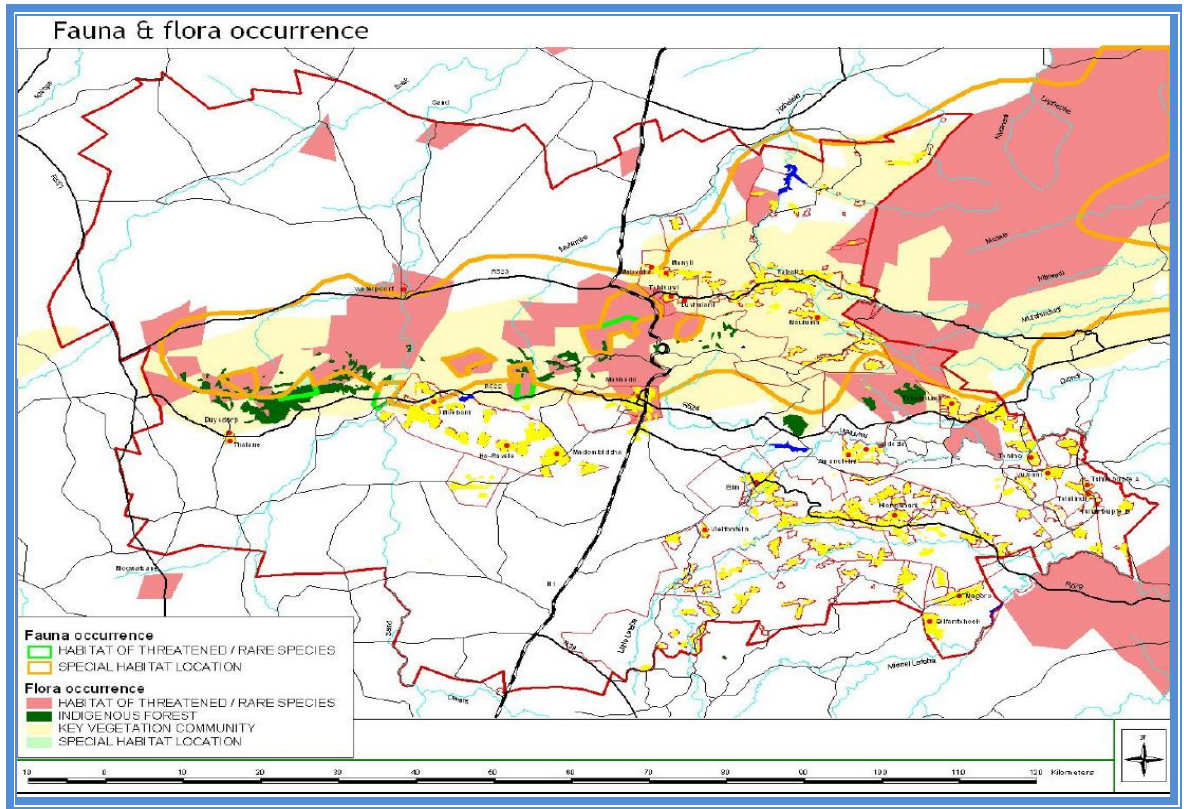

Figure 13: Fauna and Flora Occurrence

Conservation and heritage

The table below provides a break-down of areas covered in reserves and conservation areas.

Reserve name	NSBA Category	Area (in ha)
Happy Rest Nature Reserve	Nature Reserve	2714.112
Langjan Nature Reserve	Nature Reserve	4796.514
Nzhelele Nature Reserve	Nature Reserve	1400.000
No Name 23	Conservation Area	76.239
No Name 22	Conservation Area	87.405
No Name 21	Conservation Area	95.557
No Name 19	Conservation Area	2164.718
No Name 18	Conservation Area	67.351
Total		11401.896
Studholme Nature Reserve	Conservation Area	
Entabeni Nature Reserve	Conservation Area	

Source: Makahado SDF

The purpose of this analysis is to evaluate and determine the development status of the municipality and to provide basic facts and figures related to the current situation, trends and dynamics with regard to infrastructure and basic service delivery

7.2 SOCIAL ANALYSIS

Health and Social Development

Makhado Municipality is served with health care facilities such as clinics and visiting points. The following health facilities are provided within the Municipality:

- 3 Hospitals (Siloam, Elim and Louis Trichardt Memorial Hospital)
- 1 Private hospital
- 44 Clinics
- 7 Mobile Clinics
- 4 Health Centre
- 3 Places of Safety

- 1 Malaria Camp

Medical facilities are inadequate considering the size of the local population. Facilities in the urban areas are better equipped than in the rural areas. Both primary and secondary health care facilities are problematic in certain areas due to limited resources, which render it difficult to ensure that all the communities are provided with the minimum acceptable levels of health services. Most of the clinics do not provide a 24-hour service due to lack of staff and resources.

Rendering an efficient service is hampered by a shortage of staff and finances. Health centers are mostly served by one registered nurse. Most villages are too small to provide inhabitants with important health facilities. All clinics and health centers are provided with water and sanitation. The traditional healers source most of their herbs and medicinal plants from the immediate environment; although some have to be imported from elsewhere. The Kruger National Park has reached an agreement with some of the traditional healers to collect their medicinal plants from the Park.

Education

Schools

According to the Department of Education, a school should be situated within a radius of 5km from the community it serves, therefore the total walking distance to and from school may not exceed 10 km. Learners who reside outside the determined feeder zone may be provided with either transport or hostel accommodation on a progressively phased and pro-poor basis. The total minimum size for a school site, including sporting fields, is as follows:

- A total of 2.8ha for a primary school.
- A total of 4.8ha for a secondary school.

Schools are classified into primary (offer Grades R to 7) and secondary (offers Grade 8 to 12).

Primary schools are classified into:	Secondary schools are classified into
<ul style="list-style-type: none"> • Small primary schools, with a minimum capacity of 135 learners and up to one class per grade; • Medium primary schools, with a minimum capacity of 311 learners and up to two classes per grade; and • Large primary schools, with a minimum capacity of 621 learners and up to three classes per grade. • Mega Primary Schools with a minimum of 931 learners. 	<ul style="list-style-type: none"> • Small secondary schools with a minimum capacity of 200 learners and with up to two classes per grade; • Medium secondary schools with a minimum capacity of 401 learners and with up to three classes per grade; • Large secondary schools, with a minimum capacity of 601 learners and with up to five classes per grade; • Mega secondary schools with a minimum of 1 001 learners.

It must be noted that there is a shortage of special focus schools within the municipality. There is currently the Rivhoni School for the blind and Tshilwavhusiku Razwimisani Special School. The Majority of the schools also do not meet the required norms and standards as contained in Guidelines for Planning Educational Infrastructure. Makhado has the following number of schools in its area of jurisdiction.

Sec. Schools	Prim. Schools	Com. Schools	Special Needs Schools
114 Schools	251 Schools	23 Schools	3 Schools
65 610 Learners	90 241 Learners	9 481 Learners	Unspecified Learners

Table 14: Number of Educational facilities and learner enrolment

Highest Levels of Education

Educational levels are an important indicator of the quality of the work force the local labour market is able to attract. The educational levels hereunder reflect the status of the educational levels of the population as of when the census was conducted and does not take into account the actual completion of studies after the census.

Education Levels	Male	Female	Total
No schooling	15 813	39 293	55 106
Some primary	63 338	62 453	125 792
Completed primary	12 542	13 392	25 934
Some secondary	68 779	81 625	150 405
Grade 12/Std 10	27 495	35 401	62 896

Library Services

Library services play an important role in contributing to the learning and skills development initiatives for the development of the residents of the municipality.

In this regard, library and information services have identified the following medium to long-term outcomes:

- Library resources and services which include the provision of relevant information, lending and reference services, collection and development management as well as electronic information services.
- Provision of literacy programmes (ready to read)
- Educational support services.

Library and information services also offer satellite library services to those communities with no access to library services. The aim of the service is to increase & promote access to reading and learning. While the emphasis is on the elderly and youth, this is not exclusive & other social groups such as prison inmates are also served.

Makhado Municipality has fourteen established library and (10) satellite libraries services and infrastructure, namely:

- The Old age home satellite library
- Air force base satellite library
- Kutama- Sinthumule satellite library
- LTT prison satellite library
- Kids academy
- Emmanuel school
- Kutama secondary school
- ST Scholastic primary school
- Maluta secondary school
- Masungulo Primary School

There are outreach programmes that are conducted by the library and information services sections within the municipality with the aim of developing a culture of reading. The programmes are also aimed at addressing the challenge of illiteracy within the communities for a better standard of living in modern society.

Sports, Arts and Culture

The aim of this section is to provide an overview of the current situation with regard to sports (including recreation), arts and culture within the municipality. Makhado Municipality assist sports federations in running their activities. The Municipality sponsors clubs and individuals participating in competitive sports such as the annual Kremetart Cycling, Hanglip 54 Golf Tournament and the Mountain race.

Art and cultural activities are also supported by the municipality, in that the municipality has in the past years assist with the establishment and coordination of the Arts and Culture forum. The municipality has also assisted with the establishment of committees responsible for Indigenous Games, and supports activities from ward to international participation levels.

Sport and Recreation Facilities

Louis Trichardt town has several sports facilities to serve the immediate needs of the local community. There are no formal sport and recreational facilities in the rural areas. Soccer is the most popular sport and it is typically played on bare (dusty) fields. The parks in Louis Trichardt town are well maintained and tourists mostly make use of the Caravan Park adjacent the Information center along the N1 bypass.

The following is a list of Sporting facilities found throughout the municipal area.

SPORTS FACILITIES	TOTAL	LOCATION
Number of Soccer fields	7	Louis Trichardt town, Eltivilas, Rabali and Vhuilafuri
Number of Arts Centre	1	Louis Trichardt town
Number of Tennis courts	3	Louis Trichardt
Number of Soccer grounds	265	Various villages
Multipurpose centres	4	Dzanani, Makhado, Musekwa and Waterval township
Golf fields	1	Louis Trichardt town

Rugby	1	Louis Trichardt town
Volley ball	1	Louis Trichardt town
Basketball	1	Louis Trichardt town
Bowls	1	Louis Trichardt town
Squash	1	Louis Trichardt town
Wrestling hall	1	Louis Trichardt town

Table 16: Sports facilities

CHALLENGES

- Vandalism of Sports and recreational facilities
- Lack of Sports and recreational development Plan
- No easy access to leased municipal sports and recreational facilities
- Transformation and restructuring of sports and recreational Clubs.

Safety and Security

The figure below is depiction of the crime statistics per police station in the Municipality from April 2010- March 2011. The most reported crimes were contact crimes (assault) and shoplifting, followed by other serious crimes such as commercial crime. The third most reported crimes were property related crime such as burglary, stock theft, etc. There are several police stations and satellite stations in the study area. The police station with the most reported crimes is Makhado (1736), followed by Waterval (1235), Levubu (1200), Tshilwavhusiku (781), Tshitale (525) and Mara (262).

Integrated and sustainable Human settlement Analysis

Housing provision

The Constitution of the Republic of South Africa under the bill of rights states that everyone has the right to adequate housing and that the state must take reasonable legislative measures within its available resources to achieve the progressive realisation of this right. In Makhado about 16 207 people stay in

houses that are below the required RDP standard and the current housing allocations are insufficient to meet the set targets. Private land ownership is also very difficult to obtain particularly in the rural communities where there is no real housing market.

The majority of the population resides in the rural areas or in informal settlements. In general, people are informed about the housing schemes and policy through their traditional authorities, ward committees and ward councillors. Both the RDP standard housing and the Peoples Housing Process (PHP) policies are being used. For the purpose of the RDP housing scheme approach, the Department of Co-operative Governance, Human Settlements and Traditional Affairs appoints developers to build houses for beneficiaries who meet the set requirements. For the PHP approach the Department transfers funds to the municipality and the municipality facilitates the process by appointing local builders from the communities to build the houses working in collaboration with the recipients or beneficiaries.

SECTION 8: STATUS QUO ASSESSMENT

8.1: Basic service delivery and infrastructure development analysis

Water Connections

Vhembe District municipality is the water service authority and service provider (WSA and WSP). The following table reflects piped water services by group of households within Makhado Municipality. The table also shows that a total number of **33 635** households (backlog) are below the required water provision distance of less than 200m from the dwelling as per the required standards.

Water Connection Type	Households
Piped (tap) water inside dwelling/institution	21 119
Piped (tap) water inside yard	37 511
Piped (tap) water on community stand: distance less than 200m from dwelling/institution	35 623
Piped (tap) water on community stand: distance between 200m and 500m from dwelling/institution	12 805
Piped (tap) water on community stand: distance between 500m and 1000m (1km) from dwelling /institution	6 710
Piped (tap) water on community stand: distance greater than 1000m (1km) from dwelling/institution	3 452
No access to piped (tap) water	17 668

Sanitation

Vhembe District Municipality is the sanitation authority and Makhado Municipality is the service provider. Makhado Municipality has four sewage treatment plants in the following areas:

- Watervaal
- Elim
- Louis Trichardt
- Dzanani

The following table reflects the type of the sanitation facility provided within the Municipality per household. The table also reflects that there are **86 036 (backlog)** households below the required standards within the Municipality.

Type of Toilet Facility	Household
None	8 986
Flush toilet (connected to sewerage system)	16 284
Flush toilet (with septic tank)	2 233
Chemical toilet	1 036
Pit toilet with ventilation (VIP)	29 300
Pit toilet without ventilation	75 073
Bucket toilet	-
Other	1 229

Table 19: Toilet facilities by head of household**Source: Stats SA 2011 National Census, www.statsa.co.za****Electricity Provision**

About 6756 households are without electricity and the municipality has a Free Basic Electricity policy targeted at poor households. Free 50 Kilowatts units of electricity are given to the indigent households on a monthly basis. An indigent register of households earning less than R1 880 per month and/or are unemployed is kept and updated annually. About 28 212 indigent households in both Eskom and the Municipal licensed areas are receiving free basic electricity. It must also be noted that the Municipality had not reach the 2014 National Electrification target given its MTEF allocation.

Energy Supply

The following table reflects the energy used for heating per household within the Municipality.

Type of Energy Source	Households
Electricity	53 249
Gas	1 072
Paraffin	1 336
Wood	64 246
Coal	122
Animal dung	99
Solar	128
Other	3
None	14 634

Table 20: Energy or fuel for heating by head of the household**Source: Stats SA 2011 National Census, www.statsa.co.za****Free Basic Services**

Makhado Local Municipality strives to provide free basic water and electricity to all indigent households. Indigents are defined as those households, who are unable to make a monetary contribution towards basic services. The following table reflects the provision of free basic services to indigent households. The municipality has Basic Water and Sanitation Service Policy to manage the provision of basic water to the indigent people. The free basic water is 6kl per month per household. The local municipalities invoice the district, their monthly free basic water expenditure

Service	Households
Receiving Free basic Water	129 224
Receiving Free basic Electricity	6041

Figure 16: Number of households receiving free basic services
Source Vhembe District Municipality IDP

Roads and Storm Water

The internal street networks in the rural areas are predominantly gravel and un-tarred and are therefore generally problematic, particularly during rain seasons. Those in town and the surrounding townships are generally tarred and provided with storm water drainage systems.

Most of the roads linking the villages are gravelled and lack proper maintenance and cannot be used in very wet conditions. In general, the roads in Makhado Municipal area are in a bad condition and require upgrading from gravel to tar.

The total road and storm water management system backlog is estimated at approximately (4400km). The Municipality is currently upgrading some of the roads from gravel to tar. It is also important to indicate that the Roads Agency Limpopo is responsible for provincial and district roads whereas, the Municipality is responsible for local roads.

Public Transport

The National Land Transport Transition Act, 22 Of 2000, section 18 (1), (2) & (3) stipulates that Land Transport planning must be integrated with land development process and must be carried out so as to cover both public and private transport and all modes of land transport relevant in the area concerned and must focus on the most effective and economic way of moving from one point to another in the system. Transport plans must be developed to enhance effective functioning of cities, towns and rural areas through Integrated Transport Planning of transport infrastructure and facilities, transport operation including freight movement, bulk services and public transport services.

National land transport act requires municipalities to develop their ITPs which comply with the minimum requirements as set out in the: “Minimum requirements for preparation of Integrated Transport Plans” published 30 November 2007. Transport vision is an integrated safe, reliable, efficient, affordable and sustainable multimodal transport system and adequate infrastructure.

The SA transportation system is inadequate to meet the basic needs for accessibility to work, health care, schools, shops, etc. and for many developing rural and urban areas. In order to meet these basic needs for accessibility, the transport services offered must be affordable for the user. The transport system must aims to minimise the constraints on the mobility of passengers and goods, maximising speed and service, while allowing customers a choice of transport mode or combination of transport modes where it is economically and financially viable to offer a choice of modes. This demands a flexible

transport system and transport planning process that can respond to customer requirements, while providing online information to the user to allow choices to be made

Public transport within the Municipality is characterised by mini-bus taxis and buses which ferries passengers to work, schools, etc. There are a number of formal and informal bus and taxi ranks and 11 formal taxi ranks of which some are located in Makhado town and Elim. The major public transport corridors in Makhado are depicted in the table below.

Major Public Transport Corridor Routes in Makhado Area

ROUTE CODE	CORRIDOR ROUTE
Louis Trichardt to Nzhelele	Along the N1 North from Louis Trichardt and turn right along Road R523 to Nzhelele
Louis Trichardt to Elim	Along the N1 South from Makhado and turn left along Road R578 to Elim

Waste Management

Louis Trichardt town, the Air force base and the surrounding townships (5 R293 towns) have a proper waste management system in place, with sufficient capacity for the short to medium term. The lack of adequate waste disposal facilities contributes to the illegal disposal of waste by burning and this consequently affects the air quality (pollution). The Municipality has one waste transfer stations and a landfill site in the following areas:

- Louis Trichardt Town (Landfill)
- Dzanani Waste Transfer Station

It is furthermore important to note that the municipality is responsible for operating and maintaining the waste management service dealing with solid waste collection, storage and management particularly at household and business level. The Provincial Department of Economic Development and Tourism is responsible for the licensing, operation and maintenance of those waste management systems that treat and dispose medical waste.

The rural areas are serviced with a rudimentary system for waste collection. There is only one permitted landfill site within the municipality which is currently full to capacity. The process of establishing a new landfill site is underway and there are also plans in the pipeline to develop waste drop off terminals in villages. The table hereunder gives the number of households either receiving in one form or another or not receiving the service at all. The total refuse removal backlog is estimated at 121 283 (Census 2011 information).

Refuse Removal Services	Number of Households
Removed by local authority/private company at least once a week	12787
Removed by local authority/private company less often	820
Communal refuse dump	1655
Own refuse dump	105702
No rubbish disposal	12552
Other	1374

Table 21: Refuse Removal Services per Households
Source: Stats SA Census Services per Households

8.2: Public participation and good governance

Governance structures and systems such as the Internal Audit Unit, the Audit committee and the Municipal Public Accounts Committee are functional in Makhado Municipality. The following points provide a brief overview of the functions of these structures.

Internal Audit Unit

Internal Audit is an independent unit of the Makhado Municipality, and is a significant contributor to governance within the organisation. Its establishment is a requirement of the Municipal Finance Management Act (Act 56 of 2003), and it is largely directed by the standards for professional practice in internal auditing of the international Institute of Internal Auditors.

The Unit is mandated, through its charter, to provide independent, objective assurance and consulting services geared towards adding value and improving the Municipality's operations. It assists the organisation to accomplish its objectives through a systematic, disciplined approach to evaluate and improve the effectiveness of risk management, control and governance processes. Internal Audit plans, which are aligned with Municipal strategies and most pertinent risks, are supported by senior management and approved by the independent Audit Committee. It communicates audit results to the various levels of management, including Senior Management, the Municipal Manager, as well as to other assurance providers and the Audit Committee.

Audit Committee

Makhado Local Municipality has an Audit and Audit Performance Committee consisting of four members appointed in line with section 166 of the Municipal Finance Management Acts. The Audit Committee meetings are held on a quarterly basis to execute the functions as stipulated in the MFMA and the Audit Committee Charter. The Audit Committee has been functional since its establishment.

BIDS COMMITTEES

There are three bid committees to implement municipal supply chain policy: Bid specification, Evaluation and Adjudication committees.

Municipal Public Accounts Committee

The council has appointed an oversight committee (Municipal Public Accounts Committee) to interrogate the annual report and to provide an oversight function.

Communication & Public Participation

The Municipality has developed a communication strategy to deepen democracy, assist the municipality in fulfilling its obligations, constitutional and legal mandates. The strategy among others seeks to educate and create awareness, promote and popularize policies (new and old), mobilize for action and reassurance, change attitudes towards involvement in issues of governance, change negative perceptions on local government and its ability to deliver services and saw confidence in all spheres of government.

Ward Committees and Community Development Workers

There are 38 established ward committees and community development workers in each ward.

Traditional Councils

The general participation by the community and in particular the traditional councils are improving. The traditional councils have had very limited exposure to the issues of governance and other related management processes. Traditional councils also form part of the municipal council.

Performance Management

Performance management within the municipality is in twofold, organisational performance management is under the office of the Municipal Manager while individual Performance Management is not yet implemented under the Department of Corporate Support and Shared Services. Makhado Local Municipality currently has one system presently in operation.

Each senior manager is assigned a department to head as per their employment contract and in each instance, a full set of KPA, KPIs, and Targets with measurable outcomes are developed and approved by Council for execution. Annual, Performance, Mid-year and Quarterly reports on the progress of execution are presented to council at scheduled council meetings. Performance Assessments of all individual employees within the municipality should be conducted on quarterly basis and reports thereof submitted to council.

The Section 56 managers have signed employment contracts and Performance Agreements are reviewed and signed annually within 30 days after the start of every financial year.

The provisions of the Performance Management Policy, 2012 are aligned to the IDP which is reviewed annually. Projects listed as per the Key Performance Indicators for each section 56 Manager and other managers are derived from the strategic objectives and developmental strategies as contained in the IDP.

Institutional Strengths and Weaknesses

The purpose of this section is to give an overall view of the institutional strengths and weaknesses that exist within the municipality. The strengths and weaknesses are listed hereunder as follows:

In addition to the aforementioned, it is also important to note that the Municipality has insufficient office space and the necessary working tools to support the functions of the existing personnel base. There is also few technical experts and manpower to perform the required technical work and functions efficiently and effectively.

Audit Opinion

The following table reflects the Auditors General opinion for the past four financial years.

2017/18	2018/19	2019/20	2020/21
Qualified	Qualified	Unqualified	Unqualified

8.3: Municipal transformation and organisational development analysis

The purpose of this analysis is to ensure that existing institutional strengths and weaknesses are identified and taken into consideration when development strategies, projects and programmes are considered. It also serves the purpose of addressing the institutional problems of the municipality.

Organisational Structure

The municipality Organisational structure for 2019/20 financial year had not been reviewed.

Institutional Capacity

The Municipality's administrative branch has six (5) senior management positions in its organisational structure. These positions are in accordance with section 56 management positions in the Municipal Systems Act, 32 of 2000 and are referred to as Director Positions in the Municipality.

STRATEGIC PERFORMANCE OVERVIEW

Performance Management Systems

A municipality's Performance Management System entails a framework that describes and represents how the municipality's cycle and processes of performance, planning, measurement, review, reporting and improvement will be conducted, organized and managed, including determining the roles of the different role – players. It is critical that political leadership, managers and staff be involved to ensure that the municipality embraces the IDP and its

implementation (which is performance management in practice). Implementing the processes and systems needed to operationalise the IDP will determine the ultimate success of the municipality. The following needs to be taken into consideration when starting to implement the IDP:

- Plan for performance by clarifying objectives and outputs to be achieved;
- Clarify performance expectations by setting standards and targets for each indicator to assess and evaluate performance in practice;
- Monitor, measure, assess and evaluate performance, and
- Link strategic priorities, goals and objectives agreed in the IDP by:
- Enabling staff to understand how their job contributes to the aforementioned;
- Ensuring resources are directed and used in efficient, effective and economic ways by each person in the municipality;
- Including communities and other stakeholders; decision – making, monitoring and evaluation;
- Learning from experience and using it to continuously to improve what is achieved, and maintaining transparency and accountability and promoting good governance as articulated in the Batho Pele principles.

8.4: Financial viability analysis

Revenue Sources

Billing, Collection and Cost Recovery

Makhado Municipality uses the Munsoft System for billing and has appointed a service provider for debt collection and cost recovery on rates and taxes.

23. Property Rates By-Law

SECTION 8.6: LOCAL ECONOMIC DEVELOPMENT ANALYSIS

Local Economic Development (LED) is the process by which public, business and non-governmental sector partners work collectively to create better conditions for economic growth and employment generation. LED is based on local initiative, driven by local stakeholders and it involves identifying and using primarily local resources, ideas and skills in an integrated way to stimulate economic growth and development in the locality. The EPWP is a key Second Economy intervention. As part of AsgiSA, this programme will be expanded beyond its original targets (AsgiSA, 2006). South Africa is now embarked on a new economic growth path in a bid to create five-million jobs and reduce unemployment from 25% to 15% over the next 10 years.

Integrated Sustainable Rural Development Programme (ISRDS) is a national policy aimed at attaining socially cohesive and stable rural communities with viable institutions, sustainable economies and universal access to social amenities, able to attract and retain skilled and knowledgeable people, who are equipped to contribute to growth and development. Elements of ISRDS are rural development, sustainability, Integration and rural safety net.

The Limpopo Employment, Growth and Development Plan [LEGDP] has specific programmes that are designed to achieve structural change in critical areas of the provincial economy. It provides a framework for the provincial government, municipalities, the private sector and all organs of civil society to make hard choices in pursuit of the strategic priorities as encapsulated in the Medium Term Strategic Framework.

National Development Plan was developed and envisage an economy that serves the needs of all South Africans, rich and poor, black and white, skilled and unskilled, those with capital and those without, urban and rural, women and men. In 2030, the economy should be closed to full employment; equip people with the skills they need; ensure that ownership of production is less concentrated and more diverse (where black people and women own a significant share of productive assets); and be able to grow rapidly, providing the resources to pay for investment in human and physical capital.

The formal economy of the Makhado Municipality can be considered as a “dual economy”, as it comprises two distinct elements namely the sophisticated economy of the Louis Trichardt town and surrounding farms and the informal economies of surrounding townships and rural areas.

Louis Trichardt town provides a regional function to the surrounding areas (e.g. trade services, banking, manufacturing, storage, transport, etc), because of its size and level of sophistication. The economy is also able to generate a significant number of direct employment opportunities for the local communities. The economies of surrounding townships and rural areas comprise mostly of informal activities and largely serve the immediate consumption needs of local people.

Employment Status

In the analysis of the labour and employment situation in a region, it is necessary to focus attention on the size and spatial distribution of the labour force. Secondly, the characteristics of the labour market should be analysed. To this end, it is necessary to examine the supply of labour, which is derived from figures on the economically active population in a region. The productivity of a location is also directly related to the number of individuals who are active

in the workforce. High levels of economic activity are directly related both to the productivity and competitiveness of an area. Where economic inactivity is high, this indicates a loss of productive resource available to the local business base, therefore impacting negatively on overall economic performance.

According to the IHS Global Insight database, in 2011, the Municipality had an economically active population of 118,469 which represent about 21.60% of the entire population.

In recent years, in common with the provincial and district economies, the Municipality has experienced an increase in overall employment levels. The total number of employed people is 89,881 and the total number of unemployed persons is 30,691 (25.9%). The unemployment rate in Makhado has decreased by 10.2% in recent years (from 36.1% in 2001 to 25.90% in 2011). The unemployment rate for Limpopo as a whole has also decreased by 9.30% in the same period (from 29.90% to 20.60%).

The following table reflects the labour force per sector within Makhado Municipality. The majority of the labor force is employed in the informal sector and about 435 534 persons are not accounted for.

Indicator	Population
In the formal sector	48389
In the informal sector	17591
Private household	12996
Do not know	1521

Not applicable	435534
Grand Total	516031

Table 24: Labour force per sector

Labour and Employment Sectors

The main labour-absorbing sectors are the agriculture sector; community services sector; and the trade sector of the municipality. Community service and trade sectors are the predominant employers within the study area, responsible for just over 27.45% and 19.30% of the active work force respectively. Agriculture is the third largest employer absorbing around 17.40% followed by the construction sector (8.34%) and finance (5.30%).

Even though the agricultural sector is the third largest in terms of labour absorption, it has been shedding jobs since 2001 and a total of 2396 jobs were lost between 2001 and 2011. During the same period 21,262 jobs were lost in the same sector in the Province. The decline in jobs in this sector could be attributed to the trend of shifting away from employment of regular, permanent workers, and a simultaneous (though not commensurate) increase in the use of casual workers, meaning jobs of less security and consistency.

Looking at the distribution by sector, the employment data shows that job gains were mostly in the community services sector (1493) and trade (646) in 2011. Job losses were predominantly in the mining (23) and agriculture (318) sectors over the same period.

The following figure reflects the distribution of the Municipality's Employment Sector

Figure 19: Employment by sector
Source: Makhado LED Strategy (IHS Global Insight, 2012)

Poverty, Inequality and Income

There are pockets of extreme poverty within the Municipal area. Patterns of poverty and inequality have been reinforced by economic trends that have impacted harshly on semi-skilled and unskilled workers. This includes the seasonal nature of agricultural, tourism and domestic work. The economic opportunities for the poor have been undermined by the lack of connectivity between residential areas and economic hubs (between towns), poor levels of social cohesion and gender inequality. In 2011 45.4% of the population was living in poverty. Between the years 2001 and 2011 the poverty level has declined by 13.10%. Figure 2.8.3 below shows a decline of the percentages of people in poverty.

Figure 20: Percentages of people in poverty
Source: Makhado LED Strategy (HIS Global Insight, 2012)

The following table reflects the income levels of the population of Makhado and its neighbouring Municipalities.

Income Categories	Thulamela	Musina	Makhado	Grand Total

Economic Profile and Performance

The review of the economic data for the period between 2001 and 2011 for the Municipality provides an understanding of the growth or decline of sectors in Makhado over that 10 year period. Understanding the trends in economic growth provides valuable insight into the shape that future growth and investment in the Municipality might take. It also provides an indication of where the priorities of the Municipality should lie, especially with regards to programme development and delivery, and strategic planning.

Gross Value Added

Gross Value Added (GVA) is taken as the main indicator of productivity in a particular location. It is a measure in economics of the value of goods and services produced in an area or sector of an economy. From Figure 21 indicates that community services are the main contributor with a contribution of 30.00% and this shows that the economy is still deriving a significant income from government related services (public services). It is followed by finance (29%), trade sector (15%) and transport (13%).

Figure 21: Makhado Gross Value Added

Source: Makhado LED Strategy (HIS Global insight, 2012)

Economic Growth

From the analysis in figure 22 it is clear that the Municipality has experienced some growth even though not considerable in several sectors of importance which include manufacturing and trade.

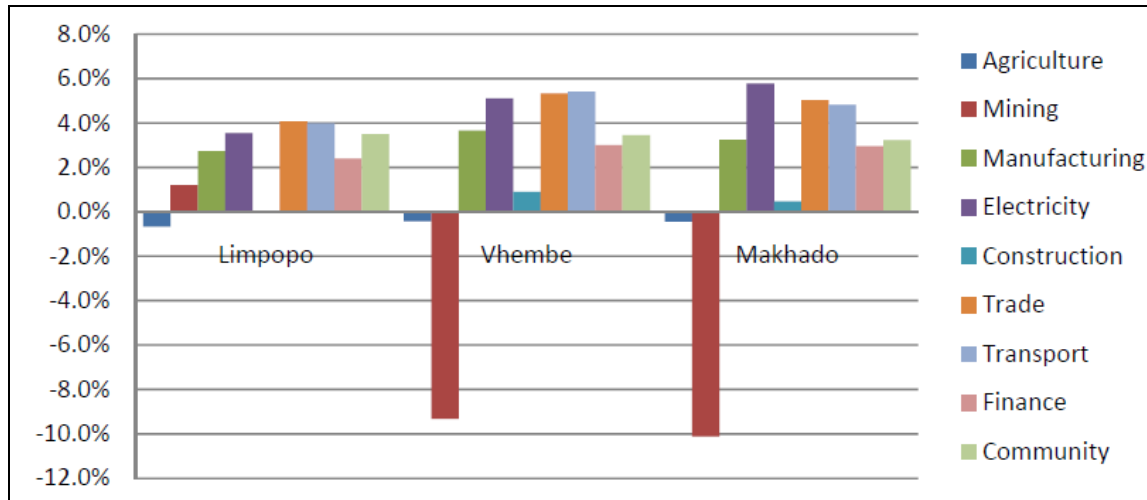

Figure 22: Average Gross Value Added Growth
Source: Makhado LED Strategy (IHS Global Insight, 2012)

- Agriculture declined by -0.7% in Limpopo, by -0.4% in Vhembe and by -0.4% in Makhado.
- Mining grew by 1.2% in Limpopo; it declined by -9.3% in Vhembe and by -10.1% in Makhado.
- Manufacturing grew by 2.7% in Limpopo, by 3.7% in Vhembe and by 3.2% in Makhado.
- Electricity grew by 3.5% in Limpopo, 5.1% in Vhembe and 5.8% in Makhado.
- The trade sector grew by 4.1% in Limpopo, by 5.3% in Vhembe and by 5.0% in Makhado.
- The transport sector grew by 4.0%, by 5.4% in Vhembe and by 4.8% in Makhado.
- Finance grew by 2.4% in Limpopo, by 3.0% in Vhembe and by 3.0% in Makhado.
- Within the same period, community services grew by 3.5% in Limpopo, by 3.4% in Vhembe and by 3.2% in Makhado.
- On the other hand, construction there was no growth in Limpopo (0.0%), but in Vhembe the sector grew 0.9% and by 0.5% in Makhado.

While the economic conditions of the municipal area are well noted, the municipality has developed the Local Economic Development Strategy in order to create opportunities for local residents, assist in the alleviation of poverty, and the redistribution of resources and opportunities to the benefit of all local residents. The strategic thrusts of the LED plan are the following:

- Overcoming the constraints to economic development in Makhado.
- Creating an enabling environment for local economic development.
- SMME and entrepreneurship development.

- Support to co operatives

Sectoral Focus

Tourism

The Tourism and Marketing Strategy has been developed in order to stimulate tourism growth in Makhado and also to develop opportunities and market the tourism icons and places of attractions that are found within Makhado municipality. There is a need to stimulate community tourism structures and other stakeholders involved in tourism. There are four community tourism associations (CTAs) in the area that are involved in tourism, namely, Soutpansberg Tourism Association, Ribolla Tourism association, Tshakhuma Tourism association and Nzhelele tourism association. The tourism Associations are operating under the name of Makhado Tourism Initiatives that receives an annual subsidy for the expenditure on tourism activities from Makhado municipality. Their office is situated at the Makhado Tourism Information centre that is found on the N1 in the building that belongs to Limpopo Tourism and Parks Board.

The following are some of the key existing natural resources that need to be preserved, promoted and developed into Tourism attraction sites:

- Soutpansberg Biosphere Reserve
- Breathing stone on Tswime mountain
- Mandadzi waterfall.

Agriculture

Makhado Municipality has areas with pivot irrigation and high agricultural activity to the west of the town. This corresponds with areas identified as cultivated land. On the other hand, areas to the south-east are mainly used for small-scale farming and subsistence farming and greatly correspond with Traditional Authority areas. There are also some areas in the Soutpansberg area (Witvlagroad) as well as Levubu area, where agricultural activities occur.

In total only 8, 54% of the total land of the Municipal area, is highly suited to arable agriculture where climate permits, and 32, 2% is intermediately suitable for arable agriculture where climate permits. These areas occur in the south-western and south-eastern parts of the Municipal area. Commercial farming areas and areas with high potential agricultural land are limited to four areas, namely in the west (south of Soutpansberg), north-west (north of Soutpansberg), central (on the Soutpansberg – Witvlag) and in the south-eastern parts Levubu area).

Makhado Municipality has areas with pivot irrigation and high agricultural activity to the west of the town. This corresponds with areas identified as cultivated land. On the other hand, areas to the south-east are mainly used for small-scale farming and subsistence farming and greatly correspond with Traditional Authority areas. There are also some areas in the Soutpansberg area (Witvlagroad) as well as Levubu area, where agricultural activities occur.

Trade and Local Business

Street vendors form an important part of the informal sector and provide goods and services that are in demand. A large number of vendors can be found at the following locations:

- Alongside the OK taxi rank in Louis Trichardt town
- In and around Eltivillas
- The walkways in Louis Trichardt town
- The sidewalks of the Elim shopping mall
- Dzanani shopping mall
- The entrance of the Siloam Hospital

In terms of the Business Act No.1 of 1991 local municipalities are responsible for the issuing of business or trading licences within their areas of jurisdiction. These licences are applicable to certain businesses which are indicated in the provisions of the Act. In Makhado the Licensing Unit is located within the Community Services Department. It offers trading licences to formal business and permits to informal businesses.

The turnaround time for acquiring a trading licence is between two to three weeks if all the requirements have been satisfied or complied with. Permits for informal trading are granted on the same day of application and the only requirement is that they should be in compliance with the relevant By-laws of the Municipality.

The application for business sites and rezoning of land is a function of the Town Planning Unit. In the Annual Report of 2016/2017 it was indicated that there are various challenges in relation to zoning applications due the lack of human resource. The turnaround period for a rezoning application is three (3) months.

There are also external agencies which are offering business development services within the municipality. These are government controlled agencies such as SEDA and LIBSA. Formal business associations within the Municipality are NAFCOC, FABCOS and the Soutpansberg Chamber of Commerce.

Local Economic Development and Support

Makhado Local Municipality has ongoing LED initiatives aimed primarily at economic upliftment and sustainable job creation. The Municipality supports the development of cooperatives and small, medium and micro enterprises in order to achieve local economic development goals. The Municipality also participates in National and Provincial programmes and projects aimed at job creation and poverty eradication, including Community Work Programme currently under implementation by the Department of Cooperative Governance and Traditional Affairs.

Makhado Municipality in conjunction with Coghsta managed to create approximately:

- 238 jobs created through the EPWP Programme
- 207 jobs created through waste management programme
- 80 jobs created through electrification programme

The Municipality also supported five cooperatives and has a preferential procurement policy in place to support local Smme's.

DEVELOPMENT OF SPECIAL ECONOMIC ZONE (SEZ) IN MAKHADO MUNICIPALITY

The minister of Trade and Industry has designated Makhado Municipality for the South African Energy and Metallurgical Special Economic Zone. A provincial steering committee has been established to deal with matters of the proposed SEZ. There are works streams established to deal with different expertise which include governance, infrastructure, environmental management, investment, town planning and skills development.

Special Economic Zone: Geographically designed area of a country set aside for specifically targeted economic activities, supported through special arrangements that may include laws and systems that are often different from those that apply in the rest of the country.

Economic Challenges and Opportunities

The purpose of this section is to give an overall view of the economic challenges as well as opportunities that exist within the municipality. The prevailing Economic challenges and opportunities are listed hereunder as follows:

Economic Challenges

- Local tourism is not developed to its full potential.
- The local economy is very small when compared to other economies in the Limpopo Province and as such the municipality is extremely dependent on changes in the provincial economy.
- There is in general low level of formal education, vocational training and the development of entrepreneurship.
- There are weak forward and backward linkages between the various economic activities (for example linkages between tourism and trade).
- The SMME sector lacks institutional arrangements and structure.

- A large portion of the community does not have the information or knowledge required for proper personal financial management.
- Banking services are centralised and are inaccessible to the communities in the rural areas.
- The formal economy is very dependent on services.
- Most cattle owners view their livestock as a status symbol rather than economic possessions.
- There is also a lack of a proper tourism and marketing programmes.

Economic Opportunities

- Aquaculture production
- Abattoir establishment
- Meat processing
- Dairy processing
- Fruit processing (achaar)
- Fresh produce market
- Nut processing and packaging plant
- Organic farming
- Wood for construction industry
- Furniture manufacturing

SECTION 9: DISASTER MANAGEMENT PLAN

The objective of this plan is to outline policy provisions and procedures for both proactive disaster prevention and reactive disaster response and mitigation phases of disaster management. The plan will also focus on strengthening municipal structures, human resources and technical instruments for proper Disaster Management within the Municipality.

Strategic Objectives

The strategic objective of the disaster management division is to promote an integrated and coordinated system of disaster management, with special emphasis on prevention and mitigation by statutory functions and other role-players involved in disaster management.

The aforementioned will be done through building and strengthening the Municipality's capacity and accountability in implementing the constitutional mandate. The Disaster Management division also aims to contribute towards the overall resilience of communities and infrastructure for reducing disaster risk, and also to strengthen the capacity of our municipality in pre-empting and responding to disaster. Taking the provisions of the Disaster Management Act into consideration a set of specific directives and strategies have been put in place to guide the management of disasters, these strategies are listed below as follows:

Pre-disaster Risk reduction	Post disaster
<ul style="list-style-type: none"> • Prevention • Mitigation • Preparedness 	<ul style="list-style-type: none"> • Response • Recovery • Rehabilitation

Table 26: Disaster Management strategic Objectives

Disaster Management Programmes

Disaster Management is a continuous and integrated multi-sectoral and multi-disciplinary process of planning and implementation of measures aimed at disaster prevention, mitigation, preparedness, response, recovery, and rehabilitation. Natural hazards and other disasters affect the country and impact the nation's development initiatives. The District developed Disaster Management Plan as required by the Disaster Management Act (Section 53). The aim of the plan is to establish uniform approach in assessing and monitoring disaster risks, implementation of integrated disaster risk management plans and risk reduction programmes and effective and appropriate disaster response and recovery to inform disaster risk management planning and disaster risk reduction.

The plan makes provision for a generic overview of hazards that will impact on the municipal economy, social welfare, sustainable development and sustainable livelihoods. The fundamental programmes envisaged are as follows:

- Establish a Disaster Management Centre.
- Establish Disaster Management committees at ward level.
- Establish communication network at ward levels.
- Establish GIS and information management system.
- Execute hazard vulnerability and risk analysis as well as continuing to plan to avoid potential disaster on an ongoing basis.
- Institute appropriate education and training, for the municipal disaster committee, ward disaster committees and volunteers on an ongoing basis.

Disaster Risk Identification, Assessment, Response and Recovery

The following table reflects the Vhembe District disaster risk profile:

Hydro Meteorological Hazards:	Biological Hazards:	Technological Hazards	Environmental Degradation:	Geological hazards:
Drought	Food poisoning	Dam failures	Air pollution	Landslide/ mudflow

Hail storms	Malaria	Derailment	Desertification	Earthquake
Cyclone	Foot and mouth disease	Hazardous installations	Deforestation	
Severe storm	Measles	Aircraft accidents	Land degradation	
Storm surges	Rabies (animals)	Hazardous material by rail	Soil erosion	
Hurricane	Tuberculosis	Hazardous materials by road		
Floods	Bilharzias			
Lightning	Cholera			
Fire	Typhoid			
	Diphtheria			

Figure 25 Vhembe District disaster risk profile
Source: Vhembe District IDP 2012-2017

Disaster Patterns

The following hazards pose the greatest risk in the municipality:

- Veld Fires
- Structural Fires
- Floods
- Epidemics
- Transport related incidents (road and rail)
- Aircraft accidents
- Droughts
- Extreme weather

SECTION 10: MUNICIPAL WARDS PRIORITY NEEDS AND CONSOLIDATED PRIORITY LISTS

The IDP analysis phase has indicated the submission of inputs from various stakeholders. These informed the consolidation of priorities and priority lists

CONSOLIDATED MUNICIPAL PRIORITY ISSUES

CLUSTER	PRIORITY ISSUES
Spatial Priorities	<ul style="list-style-type: none"> An effective land-use management system A compact urban structure The implementation of a proper environmental management plan and need for spatial integration.
Infrastructure Cluster Priorities	<ul style="list-style-type: none"> Roads (tar and gravel) Electricity provision and community lighting Storm-water drainage systems Public transport systems Water distribution networks Sanitation network and systems Housing Sport facilities Community facilities, e.g. Libraries and Community Halls

CLUSTER	PRIORITY ISSUES
	<ul style="list-style-type: none"> • Cemeteries (Fencing) • Health care centers • Recreational facilities • Safety and security facilities, e.g. police stations, municipal police satellite stations, etc.
Social Cluster Priorities	<ul style="list-style-type: none"> • The reduction of the spread of HIV/Aids • Community development • Air and water pollution • The provision of housing/housing support centers • The promotion of equity, specifically regarding disadvantaged people (e.g. women, youth, disabled and aged people) • Proper disaster management regarding: Flood disasters
Economic Cluster Priorities	<ul style="list-style-type: none"> • Creation of an enabling environment for economic development • Creation of jobs • Poverty alleviation • Agriculture/Agro-processing & manufacturing • Promotion of Tourism • Promotion of Mining • Supporting Small Micro and Medium Enterprises and • Cooperatives development
Governance and Administration Cluster Priorities	<ul style="list-style-type: none"> • Improvement of the level of payment for services • Improvement of skills levels (capacitating) of councillors and officials • The establishment of satellite municipal offices (e.g. customer care centers) • Proper communication between Council and communities • Proper revenue base • Applicable rates and taxes according to the level of services provided • Change in culture and operations at Council level • Addressing of land ownership and land tenure issues • Eradication of corruption and nepotism • Participatory IDP process • Proper management systems • Proper information technology systems

CLUSTER	PRIORITY ISSUES
	<ul style="list-style-type: none"> • Productivity of staff • Proper equipment • Effective decision-making process • Proper billing system and adequately trained and skilled staff
Justice Cluster Priorities	<ul style="list-style-type: none"> • The reduction of the crime rate • Proper traffic safety • Proper policing (municipal policing, as well as support to the SAPS) • Proper emergency services

Table 42: Consolidated priority issues per cluster

The prioritisation process followed in obtaining the priorities shown in the above Table can be summarised as follows: The analysis of the existing situation in the municipal area highlighted several issues.

- The community was consulted through the IDP representative forum and numbers of issues were raised.
- Municipal officials highlighted internal municipal issues.
- The consolidated issues would continuously be referred back to the community for prioritisation.
- Issues were prioritised on a ward basis.
- The prioritised issues were consolidated and at municipal-level prioritisation would be undertaken by the IDP Steering Committee

CONCLUSION

The size of the Municipality has brought about a situation where there are areas that are fairly well developed in contrast with other areas, which have developed very slowly. In addition to this there are areas which have over time proven themselves as natural growth centres. The urban areas are the most developed with better infrastructure.

Fragmentation of residential development gives rise to the duplication of services, which are costly and inefficient. It appears that water is the scarcest natural resources. Most rural villages do not have access to water per household stand. Provision of water is limited and some villages do not meet the RDP's minimum standard of water provision.

Increasing population levels and a variety of land uses have placed an increasing demand on water availability and thus impose pressure on water resources and the future need for alternative resources

Integrated environmental programmes are non-existent and as a result communities in the area are ignorant of fundamental environmental principles such as water saving and pollution management.

The Municipality has a broad socio-economic profile, which implies significant differences in the needs and priorities, as well as the ability to pay the full cost of services consumed. These differences render the planning processes complex and result in conflicting priorities.

.SECTION 12: SECTOR PLANS

SECTOR PLANS

The following sector plans are developed/ have to be developed or reviewed to form chapters in the IDP document.

ITEM	NAME OF SECTOR PLAN	STATUS	RESPONSIBLE DEPARTMENT
1.	3 Year Financial Plan	Available	Budget and Treasury
2.	Disaster Management Plan	Available	Community Services
3.	Electricity Master Plan	To be developed	Technical Services
4.	Employment Equity Plan	Available	Corporate and shared services
5.	Environment Management Plan	Is being developed but not approved by Council	Development Planning
6.	HIV/AIDS Plan	Need to be developed	Corporate and shared services
7.	Housing Plan/ Chapter	To be developed	Development Planning
8.	Infrastructure Investment Plan.(EPWP compliant)	To be developed	Technical Services

13.	Local Economic Development Plan	Is reviewed	Development Planning
14.	Service Delivery And Budget Implementation Plan (SDBIP)	Available	All Departments
15.	Spatial Development Framework	Is being reviewed	Development Planning

16.	Revenue Enhancement Strategy	To be developed	Budget and Treasury
17.	Work skills Plan	Available	Corporate and shared services

TABLE 33: SECTOR PLANS SOURCE: Makhado Municipality

SECTION 13: MUNICIPAL DEVELOPMENT STRATEGIES, PROGRAMMES AND PROJECTS

This section outlines the municipality's departmental plans that intend to highlight annual programmes and plans, together with annual delivery agendas. These will be monitored and reviewed annually to provide a comprehensive picture of the Municipality's performance.

In order to measure the Municipality's performance against its goals, objectives and strategies, each department within the Municipality prepared a departmental plan. These include a delivery agenda with targets and provide a high level overview of the work that the department will be completing each year. Further details on programmes would be contained in departmental Service Delivery and Budget Implementation plans (SDBIP).

The departmental plans are compiled inline with the reviewed seven strategic objectives as outline below in the following order:

MUNICIPAL FIVE YEAR CAPITAL PROJECTS AND PROGRAMMES IMPLEMENTATION PLAN

KPA	Priority Issue	Strategic Objectives	Project Name	Location/Ward	Funding Source	2022/23 R	2023/24 R	2024/25 R	2025/26 R	2026/27 R
Municipal Transformation and Organisational Development	Parks and Recreation	Promote community participation and environmental welfare	Development of LTT swimming pool (Parks) (Phase 1 Feasibility study and Phase 2 Construction)	Makhado Municipality	INCOME	R 500 000.00	R 2 000 000.00	-

SECTION 14: DISTRICT AND SECTOR DEPARTMENTS PROJECTS AND PROGRAMMES

INFRASTRUCTURE CLUSTER STRATEGIES (WATER)

Item No.	Priority Issue	Development Objective	Development Strategies	Key Performance Indicators	Performance Targets	Actions
	Water and Sanitation	To provide sustainable, reliable, safe and affordable water and sanitation services.	Finalization of Nandone bulk water system	Number of households with access to basic level of water	Reporting only	Bulk Water Infrastructure Network
			Upgrading of the bulk water system	Number of households with access to basic level of water	Reporting only	Bulk Water Distribution Network
			Pipe lines construction to extend the internal reticulation to newly developed settlements.	Number of households with access to basic level of water	Reporting only	Internal Water Reticulation Network
			Refurbishment and upgrading of existing water infrastructure.	Number of water supply interruptions	Reporting only	Improved Level of Service
			Install yard water connection for proper water management purpose.	Percentage reduction on yard water connection backlog	100%	Water Supply Yard Connection
			Address the current backlog of 38 204 by 2012. (National Target).	Percentage of households provided with basic electricity backlog by 2012		Electricity Supply Network
			To provide basic sanitation to address the current backlog of 8 251 to meet National target by 2014.	Number of households with access to basic level of sanitation.	Reporting only	VIP Latrines

		All indigent households to have access to ventilated pit latrine on site.	Number of indigent household with access to VIP latrines toilets	Reporting only	VIP Latrines
		Provision of water and sanitation to all clinics.	Percentage of clinics that are provided with water and sanitation	Reporting only	Improved Level of Service
		To develop a comprehensive integrated infrastructure Plan.	Plan developed	1	Comprehensive Integrated Plan
		To strengthen the institutional capacity on planning and management of infrastructure.	Percentage of projects completed that achieve the specifications and completed on time.	12	Completed Infrastructure Development Projects
		Conduct research on alternative reliable water source	Percentage of household with access to basic water supply	Reporting only	Water Supply Augmentation Infrastructure
		Municipality to apply for a WSA status.	Makhado Municipality To be Declared a WSA	Reporting only	The Municipality to be recognized as a WSA
	Provision of municipal services	Access to basic level of services	Percentage of customer complaints relating to water and sanitation problems resolved within 24 hours	100%	Customer satisfaction
