ACTUAL COSTS																							
Supply, delivery, installation and commissioning of LV (supply point)																							
TYPE	UNIT PRICE																						
11kV RMU	Average cost price at that time from stores)																						
80m 11kV cable, terminations and joints																							
Mini Substation																							
LV Metering Units																							
LV circuit protection																							
16kVA 1PH																							
25 kVA																							
50 kVA																							
100 kVA																							
200 KVA																							
2 MVA transformer																							
11kV panel (ARC)																							
22kV panel																							
Cabling																							
Structure civil																							
2	<table> <tr> <th colspan="2">ENGINEERING CONTRIBUTIONS</th></tr> <tr> <th>Item identification</th><th>CAPACITY REQUIRED DIVIDED BY CAPACITY OF THE SUBSTATION MULTIPLIED BY VALUE OF THE SUBSTATION</th></tr> <tr> <td>Eng contributions towards additional capacity required on networks availability(substation capacity)</td><td rowspan="5"></td></tr> <tr> <td>Eng contributions towards additional capacity on MV networks from main sub to substation that the required capacity is</td></tr> <tr> <td>Eng contributions towards additional capacity on networks from sub to secondary substation where the capacity is required</td></tr> <tr> <td>Eng contributions towards additional capacity at main sub to be made available by Eskom</td></tr> <tr> <td></td></tr> </table>	ENGINEERING CONTRIBUTIONS		Item identification	CAPACITY REQUIRED DIVIDED BY CAPACITY OF THE SUBSTATION MULTIPLIED BY VALUE OF THE SUBSTATION	Eng contributions towards additional capacity required on networks availability(substation capacity)		Eng contributions towards additional capacity on MV networks from main sub to substation that the required capacity is	Eng contributions towards additional capacity on networks from sub to secondary substation where the capacity is required	Eng contributions towards additional capacity at main sub to be made available by Eskom													
ENGINEERING CONTRIBUTIONS																							
Item identification	CAPACITY REQUIRED DIVIDED BY CAPACITY OF THE SUBSTATION MULTIPLIED BY VALUE OF THE SUBSTATION																						
Eng contributions towards additional capacity required on networks availability(substation capacity)																							
Eng contributions towards additional capacity on MV networks from main sub to substation that the required capacity is																							
Eng contributions towards additional capacity on networks from sub to secondary substation where the capacity is required																							
Eng contributions towards additional capacity at main sub to be made available by Eskom																							

3 **LABOUR**

ARTISAN/ Electrician	Rate per hours worked based on salary scale
ARTISAN Assistant	
Service worker	

4 **TRANSPORT**

LDV bakkie	Rate per kilometre travelled based on Tariffs for use of Motor Transport (From Dept of Transport) and Engine capacity
Trucks	
TLB For Road crossing	R 5 245-00

5 Admin Service	10% of the Total costs
